Collaborative Networks and Their Breeding Environments
Luis M. Camarinha-Matos, Hamideh Afsarmanesh, Angel Ortiz, 2005-08-31 Progress in collaborative networks continues showing a growing number of manifestations and has led to the acceptance of Collaborative Networks CN as a new scientific discipline Contributions to CN coming from multiple reference disciplines has been extensively investigated In fact developments in CN have benefited from contributions of multiple areas namely computer science computer engineering communications and networking management economy social sciences law and ethics etc Furthermore some theories and paradigms defined elsewhere have been suggested by several research groups as promising tools to help define and characterize emerging collaborative organizational forms Although still at the beginning of a long way to go there is a growing awareness in the research and academic world for the need to establish a stronger theoretical foundation for this new discipline and a number of recent works are contributing to this goal From a utilitarian perspective agility has been pointed out as one of the most appealing characteristics of collaborative networks to face the challenges of a fast changing socio economic context However during the last years it became more evident that finding the right partners and establishing the necessary preconditions for starting an effective collaboration process are both costly and time consuming activities and therefore an inhibitor of the aimed agility Among others obstacles include lack of information e g non availability of catalogs with normalized profiles of organizations and lack of preparedness of organizations to join the collaborative process Overcoming the mismatches resulting from the heterogeneity of potential partners e g differences in infrastructures corporate culture methods of work and business practices requires considerable investment Building trust a pre requisite for any effective collaboration is not straight forward and requires time Therefore the effective creation of truly dynamic collaborative networks requires a proper context in which potential members are prepared to rapidly get engaged in collaborative processes The concept of breeding environment has thus emerged as an important facilitator for wider

dissemination of collaborative networks and their practical materialization The PRO VE 05 held in Valencia Spain continues the 6th event in a series of successful working conferences on virtual enterprises This book includes selected papers from that conference and should become a valuable tool to all of those interested in the advances and challenges of collaborative networks

Pervasive Collaborative Networks Luis M. Camarinha-Matos, Willy Picard, 2008-08-27 COLLABORATIVE NETWORKS Becoming a pervasive paradigm In recent years the area of collaborative networks is being consolidated as a new discipline Camarinha Matos Afsarmanesh 2005 that encompasses and gives more structured support to a large diversity of collaboration forms In terms of applications besides the traditional sectors represented by the advanced supply chains virtual enterprises virtual organizations virtual teams and their breeding environments new forms of collaborative structures are emerging in all sectors of the society Examples can be found in e government intelligent transportation systems collaborative virtual laboratories agribusiness elderly care silver economy etc In some cases those developments tend to adopt a terminology that is specific of that domain often the involved actors in a given domain are not fully aware of the developments in the mainstream research on collaborative networks For instance the grid community adopted the term virtual organization but focused mainly on the resource sharing perspective ignoring most of the other aspects involved in collaboration The European enterprise interoperability community which was initially focused on the intra enterprise aspects is moving towards inter enterprise collaboration Collaborative networks are thus becoming a pervasive paradigm giving basis to new socio organizational structures

Virtual Enterprises and Collaborative Networks Luis M. Camarinha-Matos, 2006-04-10 Collaborative Network Organizations CNO corresponds to a very active and steadily growing area For instance Virtual enterprises Virtual Organizations PVC suggest new ways of work and put the emphasis on collaborative networks of human actors Further to these main lines other collaborative forms and patterns of collaborative

behavior are emerging not only in industry but also in service sector as well as governmental and non government social organizations e g the collaborative networks for rescue tasks in disaster situations time bank organizations etc The concept of breeding environment is now understood as a fundamental entity to enable dynamic collaborative organizations
