How to Be Cross Eyed Jonathan Roseland, 2019-01-01 There s that moment when you meet a new person and you can tell that they are just a bit disoriented by your weirdness You feel that familiar little pang of embarrassment and shame because you know how weird you must look to them You re physically imperfect So am I I know that moment as well as you do But you don t have to be cross eyed or have a conspicuous physical imperfection to enjoy this book Really thriving requires an uncommon set of barely legal Biohacking tools social dynamics strategies from the fringes of polite society and rapid mindset transformation technologies which this lifehacking manifesto delves deeply into This book is especially for that one or two percent of the population who have a glaring physical defect Which I fall into I m cross eyed with Strabismus if you re reading this perhaps you are too There are certainly people out there with more conspicuous physical imperfections who have it worse than I do However the eyes are the window to the soul they really are a part of nearly every important human interaction Not having normal eyes has been a disadvantage that I ve needed to develop a specific set of skills and life strategies to overcome I was talking to my lovely fianc e about this book and she asked me if the purpose of the book was to help the self esteem of people with physical imperfections Not really This book is more about the lifehacks that I ve employed over the past 10 years strategies methods and tools that really work to help you overcome the challenge of a physical imperfection and thrive These things will likely improve your self esteem but they will also work if you have low self esteem or no self esteem or too much self esteem as I m sometimes accused of having Self esteem is not my focus My focus is on things that work This is not your typical self help book I ve had a pretty interesting life I ve seduced a politician s daughter in Medellin Colombia and I hung out with spies in Kyiv Ukraine I ve almost died underwater twice I participated in a bank robbery and I lost my virginity to a spy yes really From having sex in a brand new Maserati and getting in high speed car chases to being deported from South American countries and representing the US Presidential candidate Donald J Trump I ve found the happiness that I didn t give a damn about and realized my dream of becoming an adventuring philosopher I m not a

theorist in the business of making generalizations The tactics and tools presented here are for rigorous practitioners ethical hedonists and open minded self experimenters I may sound like quite the pompous pontificator but I ll offer no apologies because storytelling is the best way to impart the unconventional mindset that saved me from mediocrity and the biohacks that enabled me to defy my selfish genes If you re bored of the tired problem generalization platitude strategy formula that most self help books follow you ll enjoy this memoir of adventures failures and unexpected successes across three continents I ll share with you some powerful tools for transformation biohacking smart drugs flowstate red pill mindset and more with which I ve managed to pack several lifetimes worth of peak experiences into a single decade

The Spark Factor Dr. Molly Maloof, 2023-01-31 Foreword by Dave Asprey A breakthrough program for women to revive their lost energy and vitality developed by a leading biohacker and physician Inside of you there is a

spark it's what animates you and without it you could not live. This energy creation isn't mystical nor is it spiritual; it is science. We know from research that our cellular machinery transforms the food we eat and the air we breathe into the electricity that fuels us. With the right lifestyle inputs we glow with energy, but when the demands on our bodies exceed our capacity—as is true for so many of us—we become burned out mentally and physically. Now in *The Spark Factor*, Dr. Molly Maloof shares a program uniquely tailored to the biology of women: a plan that targets the mitochondria, the power source of the cells. As Dr. Maloof shows, the intense all-or-nothing approaches commonly used by biohackers to optimize health—including sustained fasting, ultra-low carb diets, and intense training—can be harmful, especially for women, because they create excessive stress in an already stressed body, which can make us tired, weak, and prone to illness. Dr. Maloof's innovative program, which has been used successfully by her patients, offers lifestyle changes that target the unique biology of women and provide immediate and long-term benefits. Instead of denying our bodies, we need to listen to what they are telling us. Once we become aware of our physical needs, we can give ourselves the resources to become more connected, nourished, safe, and strong at both the micro and the macro level. With cutting-edge biohacking insights, strategies for personalized nutrition, hormonal health, and stress management, *The Spark Factor* is the book women have been waiting for to help them reclaim their vitality and achieve lasting health.

The Signals Are Talking Amy Webb, 2016-12-06 Amy Webb is a noted futurist who combines curiosity, skepticism, colorful storytelling, and deeply reported real-world analysis in this essential book for understanding the future. *The Signals Are Talking* reveals a systemic way of evaluating new ideas bubbling up on the horizon, distinguishing what is a real trend from the merely trendy. This book helps us hear which signals are talking sense and which are simply nonsense so that we might know today what developments, especially those seemingly random ideas at the fringe, as they converge and begin to move toward the mainstream, that have long-term consequences for tomorrow. With the methodology developed in *The Signals Are Talking*, we learn how to think like a futurist and answer vitally important questions: How will a technology like artificial intelligence, machine learning, self-driving cars, biohacking bots, and the Internet of Things affect us personally? How will it impact our businesses and workplaces? How will it eventually change the way we live, work, play, and think, and how should we prepare for it now? Most importantly, Webb persuasively shows that the future isn't something that happens to us passively. Instead, she allows us to see ahead so that we may forecast what's to come, challenging us to create our own preferred futures.

Evasive Entrepreneurs and the Future of Governance Adam Thierer, 2020-04-28 Innovators of all stripes, such as Airbnb and Uber, are increasingly using new technological capabilities to circumvent traditional regulatory systems or at least put pressure on public policymakers to reform laws and regulations that are outmoded, inefficient, or illogical. Disruptive innovators are emerging in other fields too, using technologies as wide-ranging as 3D printers, drones, driverless cars, Bitcoin, and blockchain, virtual reality, the Internet of Things, and more. Some of these innovators just love to tinker. Others want to change the world with new, life-enriching products. And many more are just

looking to earn a living and support their families Regardless of why they are doing it these evasive entrepreneurs innovators who don't always conform to social or legal norms are changing the world and challenging their governments Beyond boosting economic growth and raising our living standards evasive entrepreneurialism can play an important role in constraining unaccountable governmental activities that often fail to reflect common sense or the consent of the governed In essence evasive entrepreneurialism and technological civil disobedience are new checks and balances that help us rein in the excesses of the state make government more transparent and accountable and ensure that our civil rights and economic liberties are respected Evasive Entrepreneurs and the Future of Governance explores why evasive entrepreneurs are increasingly engaged in different forms of technological civil disobedience and also makes the case that we should accept and often even embrace a certain amount of that activity as a way to foster innovation economic growth and accountable government
