Almost all the countries are working on their climate policy to do their part in reducing carbon emissions. Many global conferences and events have been happened in the past 50 years to control the global temperature rise. But still there is no evidence of significant improvement in reducing our global carbon emissions. Some of you might have thought about your role in combating climate change. To answer this we came up with this book which will help you to understand your carbon footprint and the possible ways to reduce the same. We have covered some of the products, events and activities in this book with which you can find the carbon footprint of the products which aren't covered in this book. With engaging writing, leading carbon expert Mike Berners-Lee shares new carbon calculations based on recent research. He considers the impact of the pandemic on the carbon battle, especially the embattled global supply chain and adds items we didn't consider a decade ago like bitcoin and other cryptocurrencies. Supported by solid research, cross referenced with other expert sources, illustrated with easy to follow charts and graphs and written with Berners-Lee's trademark sense of humor.
