OECD Urban Studies The

Blue Economy in Cities and Regions A Territorial Approach OECD,2024-04-12 The blue economy is a major driver of urban and regional development creating millions of local jobs in water dependent sectors such as fisheries tourism and shipping However it can also contribute to carbon emissions and ecosystem degradation while its reliance on freshwater coastal and marine ecosystems exposes it to the impacts of climate change As the places where the blue economy takes place creates value and provides jobs cities and regions play a key role in unlocking the potential of a resilient blue economy that preserves the ecosystems that sustain it Building on a global survey of 80 cities regions and basins this report highlights the costs and benefits of the blue economy at subnational level shedding light on the link between the blue economy and water security This analysis provides an overview of the multi level governance of the blue economy and related gaps It calls on cities and regions to develop resilient inclusive sustainable and circular RISC proof blue economies by establishing the right governance conditions related to policy making policy coherence and policy implementation The report concludes with a RISC Assessment Framework that offers a self evaluation tool for subnational governments

OECD Urban Studies

City-to-City Partnerships to Localise the Sustainable Development Goals OECD,2023-04-20 City to city partnerships and decentralised development co operation DDC can play a key role in advancing the SDGs and in addressing global megatrends the aftermath of the COVID 19 pandemic and other shocks This report discusses the framework conditions for effective city to city partnerships and takes stock of existing monitoring and evaluation mechanisms

Dynamics of Long-Life Assets Stefan N. Grösser,Arcadio Reyes-Lecuona,Göran Granholm,2017-05-10 This book is published under a CC BY NC 4 0 license The editors present essential methods and tools to support a holistic approach to the challenge of system upgrades and innovation in the context of high value products and services The approach presented here is based on three main pillars an adaptation mechanism based on a broad understanding of system dependencies efficient use of system knowledge through involvement of actors throughout the process and technological solutions to enable efficient actor communication and information handling The book provides readers with a better understanding of the factors that influence decisions and put forward solutions to facilitate the rapid adaptation to changes in the business environment and customer needs through intelligent upgrade interventions Further it examines a number of sample cases from various contexts including car manufacturing utilities shipping and the furniture industry The book offers a valuable resource for both academics and practitioners interested in the upgrading of capital intensive products and services The work performed in the

project Use It Wisely UiW significantly contributes towards a collaborative way of working Moreover it offers comprehensive system modelling to identify business opportunities and develop technical solutions within industrial value networks The developed UiW framework fills a void and offers a great opportunity The naval construction sector of small passenger vessels for instance is one industry that can benefit Nikitas Nikitakos Professor at University of the Aegean Department of Shipping Trade and Transport Greece Long life assets are crucial for both the future competitiveness and sustainability of society Make wrong choices now and you are locked into a wrong system for a long time Make the right choices now and society can prosper This book gives important information about how manufacturers can make right choices Arnold Tukker Scientific director Institute of Environmental Sciences CML Leiden University and senior scientist TNO **Learning Factories of the Future** Sebastian Thiede, Eric Lutters, 2024-07-10 This book presents peer reviewed papers from 14th International Conference on Learning Factories CLF 2024 that took place from April 17 19 2024 at the University of Twente the Netherlands CLF 2024 continued the successful CLF conference series targeting the latest research and development in the field of learning factories The book is organized into two volumes and covers state of the art research insights towards Learning Factories of the Future including learning factory design Industry 5 0 digital twinning and VR AR 5G 6G in learning factories AI for manufacturing systems human centred work design human robot collaboration sustainability in learning factories as well as cross learning factory product production systems The book seamlessly integrates theory with real world practice empowering learners such as students qualified engineers and workers to keep pace with rapidly evolving technologies and methodologies through enhancing learning factories It also helps society and industry effectively manage future transitions with addressing current topics around digitalization sustainability and lifelong learning in industry

Sustainability of Fossil Fuels Pavel A. Strizhak, 2019-07-11 The energy and fuel industries represent an extensive field for the development and implementation of solutions aimed at improving the technological environmental and economic performance of technological cycles In recent years the issues of ecology and energy security have become especially important Energy is firmly connected with all spheres of human economic life but unfortunately it also has an extremely negative often fatal effect on the environment and public health Depletion of energy resources the complexity of their extraction and transportation are also problems of a global scale Therefore it is especially important nowadays to try to take care of nature and think about the resources that are necessary for future generations For scientific teams in different countries the development of sustainable and safe technologies for the use of fuels in the energy sector will be a challenge in the coming decades *Sustainability of Young Companies-Contemporary Trends and Challenges* Marek Jabłoński, 2019-07-11 Ensuring the sustainability of early stage companies and increasing awareness of the need for balancing targets against different stakeholder groups among young companies are not well developed Young companies in the first place want to achieve financial success very often without regard for aspects such as the environment positive

relationships with employees suppliers or other stakeholder groups fulfilling requirements of labor law etc Another issue is that of companies whose business models are based on actuarially preferred concepts such as sharing economy sustainable development e comers e commerce renewable energy social media and others A key issue is the resignation of companies from an approach to business based on the foundations of classical economics to the sharing economy Theory and practice seek new solutions in the sphere of value sharing in these new areas of sharing and innovative forms of its implementation Intriguing is the relationship of these business models with sustainability issues as well as wondering how technology can influence sustainability A contemporary approach to consumer value fits in with the assumption of a shared economy It is interesting how it affects the assumptions of sustainability of business The ongoing changes in the value system of potential consumers create new conditions for the design of sustainability business models and creation of innovation Handbook of Sustainability Science in the Future Walter Leal Filho, Anabela Marisa Azul, Federica Doni, Amanda Lange Salvia, 2023-08-14 Humanity will have to cope with many problems in the coming decades for instance the world population is likely grow to 8.8 billion people by 2035 Also changing climate conditions are negatively affecting the livelihoods of millions of people In particular environmental disasters are causing substantial damages to properties From a social perspective the inequalities between rich and poor nations are becoming even deeper and in many countries conflicts between national and international interest groups are intensifying The above state of affairs suggest that a broader understanding of the trends which may lead to a more sustainable world is needed especially those which may pave the way for future developments In other words we need to pave the way for sustainable futures Consistent with this reality the proposed Encyclopedia of Sustainability Futures aims to identify document and disseminate ideas experiences and visions from scientists member of nongovernmental organisations decision makers industry representatives and citizens on themes and issues which will be important in pursuing sustainable future scenarios In particular the publication will focus on scientific aspects as well as on social and economic ones also considering matters related to financing and infra structures which are important in pursuing a sustainable future The Encyclopedia of Sustainability Futures will involve the contributing authors in line with the principle of co generation from across a wide range of disciplines e.g education and social sciences natural sciences engineering the arts languages etc with papers adopting a long term sustainability perspective with a time horizon until 2050 The focus will be on themes which are felt as important in the future and the chapters are expected to interest and motivate a world audience This book is part of the 100 papers to accelerate the implementation of the UN Sustainable Development Goals initiative

Checklist of Wisconsin Public Documents ,1917

Eventually, you will certainly discover a new experience and completion by spending more cash. yet when? get you bow to that you require to get those all needs when having significantly cash? Why dont you attempt to acquire something basic in the beginning? Thats something that will lead you to understand even more not far off from the globe, experience, some places, similar to history, amusement, and a lot more?
