Chen, Gino Fragomeni, 2023-07-08 This book constitutes the refereed proceedings of the 15th International Conference on Virtual Augmented and Mixed Reality VAMR 2023 held as part of the 25th International Conference HCI International 2023 in Copenhagen Denmark in July 2023 The total of 1578 papers and 396 posters included in the HCII 2022 proceedings was carefully reviewed and selected from 7472 submissions The VAMR 2023 proceedings were organized in the following topical sections Designing VAMR Applications and Environments Visualization Image Rendering and 3D in VAMR Multimodal Interaction in VAMR Robots and Avatars in Virtual and Augmented Reality VAMR in Medicine and Health VAMR in Aviation and User Experience in VAMR

Professional and Business Communication Peter Hartley, Susie Marriott, Helena Knapton, 2023-05-30 This new edition of Professional and Business Communication is an ideal core communications textbook for students on business management and professional courses preferring a practice focused and colloquial approach that combines accessibility with key theory Techniques and processes detailed in the book include planning and preparing written communication effective structures in documents diverse writing styles managing face to face interactions using visual aids

delivering presentations and organising effective meetings The third edition of this popular text has been thoroughly revised and updated to cover the dramatic shifts in communication practices that have been driven by remote working and increased technology use It explores the current and likely future impact of these changes on communication practices both for good borderlessness flexibility and bad isolation burnout fatigue and looks at contemporary trends and future developments This edition has also been revised to include even more examples cases tasks activities and discussion topics with pedagogical features designed to aid international students This popular text and the accompanying website will continue to support students on business management and professional courses for years to come *Futureproofing Engineering Education for Global Responsibility* Michael E. Auer, Tiia Rützmann, 2025-03-19 This book contains papers in the fields of Virtual and augmented learning Games in engineering education Social aspects of digitalization Technical teacher training Accessible learning and technologies Dance of data in educational science and practice Engineering education for production and service structures of the future Innovative approaches to STEAM education and music therapy through emerging technologies We are currently witnessing a significant transformation in the development of education on all levels and especially in post secondary and higher education To face these challenges higher education must find innovative and effective ways to respond in a proper way Changes have been made in the way we teach and learn including the massive use of new means of communication such as videoconferencing and other technological tools *Once Upon Tomorrow* Shurick Agapitov, 2024-03-05 Shurick Agapitov's *Once Upon Tomorrow* unpacks the sometimes vague concept of the metaverse and shares the opportunities that are and will be available within this new world Thirty years ago the advent of the internet changed the world For the first time in human history the collected knowledge of all mankind was freely available to every man woman and child on the planet with the click of a few buttons Fifteen years ago the world changed again with the widespread availability and adoption of smartphones that put the full power of the internet in the palm of our hands whenever we want and wherever we are As monumental as these advancements were they were just the warmup for the change that's coming next In just a few years we won't think of going on the internet to look up information and find entertainment Instead we'll already be in the internet living working and playing in an endless virtual world that will turn everything we think we know about the internet on its head Welcome to the Metaverse In *Once Upon Tomorrow* visionary tech CEO Shurick Agapitov dives deep into this new age of the internet by unpacking exactly what the Metaverse is and what it will become It's not about pixels and computer chips it's a total paradigm shift what will revolutionize how people interact share stories create and implement ideas conduct business and literally live their lives The Metaverse will be the biggest change any of us have ever seen Fortunately Shurick Agapitov is here to take you by the hand and welcome you into this wild wonderful new universe of opportunity *Virtual Reality and the Built Environment* Jennifer Whyte, 2007-08-22 This is the first text to focus on virtual reality applications for design of the built environment This guide explores the use of virtual

reality at the practical level It provides an overview of industrial applications of virtual reality and explores relevant scientific research Virtual Reality in the Built Environment is a guide to the practical uses of virtual design construction and management Providing an overview of industrial applications for virtual reality and exploring relevant research this book is an accessible and innovative resource for architects designers and built environment professionals bridging the gap between technological vision and current practice Author Jennifer Whyte shows how interactive spatial real time technologies can radically improve modelling and communication of ideas enable participation in the design process and facilitated planning and management at the urban scale The experience of lead users of virtual reality is used as the basis for understanding its promise and problems Explanations of the underlying principles of this exciting interactive medium a discussion of the cognitive technical and organizational issues it raises and international case studies illustrating practical applications are all included in this guide The author also provides a companion web site which provides online learning materials including test yourself questions virtual reality models and links to relevant sites making it a valuable design resource and a stimulus for innovation

Inevitability of AI Technology in Education Yoav Armony, Orit Hazzan, 2024-09-18 This book layouts historic and future perspectives at the introduction of technology into education systems On the one hand the book attempts to explain why despite numerous attempts technology has struggled to integrate successfully into the education system for over a century on the other hand it explores whether this trend will persist in the foreseeable future questioning if emerging technologies like virtual reality or Gen AI will ever be embraced by education systems worldwide and introducing a hypothesis that these technologies will become inevitable so that education systems will have a little choice in adopting them The underlying perspective is that education systems need to prepare for this new future and better start doing so now The book encompasses three key areas education technology and future studies with a focus on how technology will shape the future of education It begins by examining past failures of integrating technology into education analyzing the reasons behind these setbacks It progresses to assess the potential integration of future technologies 10 20 years from now exploring a feasible scenario and the force implications on learning teachers and the system Examining recent attempts to implement technology in education reveals numerous reasons for failure A significant contributing factor appears to be inherent conflicts within the education system s fundamental structure These conflicts involving goals curricula organizational structure pedagogy and student management prevent the system from embracing reforms or new technologies Envisioning a future where technology will deeply know the students sense their environment understand the context and the situation explain and advise them on the best suitable behavior or activity the book anticipates applications in education ranging from ensuring personal safety and health to enhancing knowledge acquisition and decision making As the book explores the potential inevitability of technology in education it recognizes the transformative impact on teachers and students and outlines possible desire scenario to aid in preparation such as personalized education to better suit student s capabilities

needs and desires how to motivate students to learn in an environment where all tasks can be done by machines ethical issues the new role of the school the educator and the system etc This book is especially suitable for teachers educators public officials and anyone interested in the future of education
