

A LETHAL INVOLVEMENT

"A master of
the genre."
Sunday Telegraph

A woman with long, wavy blonde hair is shown from the chest up. She is holding a silver handgun in her right hand, with the barrel pointed towards the camera. She has a serious expression on her face.

A Lethal Involvement:

The Ethics of Medical Involvement in Capital Punishment Joseph B.R. Gaie, 2006-04-11 The morality of capital punishment has been debated for a long time This however has not resulted in the settlement of the question either way Philosophers are still divided In this work I am not addressing the morality of capital punishment per se My question is different but related It is this Whether or not capital punishment is morally right is it moral or immoral for medical doctors to be involved in the practice To deal with this question I start off in Chapter One delineating the sort of involvement the medical associations consider to be morally problematic for medical doctors in capital punishment They make a distinction between what they call 2 medicalisation of and involvement in capital punishment and argue that there is a moral distinction between the two Whilst it is morally acceptable for doctors to be involved in capital punishment according to the medical associations it is immoral to medicalise the practice I clarify this position and show what moral issues arise I then suggest that there should not be a distinction between the two The medical associations argue that the medicalisation of capital punishment especially the use by medical doctors of lethal injection to execute condemned prisoners is immoral and therefore should be prohibited because it involves doctors in doing what is against the aims of medicine

Mental Health and Human Rights Michael Dudley, Derrick Silove, Fran Gale, 2012-06-21 People with mental disorders often suffer the worst conditions of life This book is the first comprehensive survey of the mental health human rights relationship It examines the relationships and histories of mental health and human rights and their interconnections with law culture ethnicity class economics biology and stigma

Angels of Death Roger S. Magnusson, 2013-05-09 Public discussion of euthanasia and assisted suicide is growing In Australia as elsewhere the debate is difficult contentious and confronting and hampered by the secrecy that necessarily surrounds illegal practice Most people simply have no way of knowing how and how often medically assisted death actually occurs Roger Magnusson presents for the first time detailed first hand accounts by doctors nurses therapists and other health professionals who have been participants in assisted death All have been intimately involved in caring for people with AIDS both in Australia and in California He places these ambivalent self incriminating accounts within the broader context of the right to die debate and the challenges of palliative care The frankness of the health workers and the richness of their collected evidence set this book apart From within a culture of deception they speak knowingly and movingly of the merciful release of a peaceful death while acknowledging the reality of botched attempts euthanasia without consent precipitative euthanasia lack of accountability and professional distance and many other disturbing issues Angels of Death provides a window into the euthanasia underground a secret part of medicine and nursing that few professionals will publicly acknowledge It brings a sense of urgency and precision to public debate and equips us all to think more independently about these crucial issues

Ethics in Pharmacy Practice: A Practical Guide Dennis M. Sullivan, Douglas C. Anderson, Justin W. Cole, 2021-06-16 This textbook offers a unique and accessible approach to

ethical decision making for practicing pharmacists and student pharmacists Unlike other texts it gives clear guidance based on the fundamental principles of moral philosophy explaining them in simple language and illustrating them with abundant clinical examples and case studies The strength of this text is in its emphasis on normative ethics and critical thinking and that there is truly a best answer in the vast majority of cases no matter how complex The authors place high trust in a pharmacist's moral judgment This teaches the reader how to think based on ethical principles not necessarily what to think This means navigating between the two extremes of overly theoretical and excessively prescriptive The cogent framework given in this text uses the language of competing duties identifying the moral principles at stake that create duties for the pharmacist This is the balancing act of normative ethics and of deciding which duties should prevail in a given clinical situation This work presents a clear cut pathway for resolving ethical dilemmas encountered by pharmacists based on foundational principles and critical thinking Presents a clear cut pathway for resolving the ethical dilemmas encountered by pharmacists based on foundational principles and critical thinking Jon E Sprague RPh PhD Director of Science and Research for the Ohio Attorney General The Drones New Era ARTUR VICTORIA,2025-06-12 Unmanned aerial vehicles UAVs commonly referred to as drones have irrevocably altered the scene of modern warfare Their proliferation across the globe employed by both state and non state actors necessitates a thorough understanding of their capabilities limitations and implications for military strategy and international security This book serves as a foundational introduction to the world of drone warfare providing a comprehensive overview of the technology its applications future technologies development and its far reaching consequences Current UCAVs rely heavily on human operators for decision making even in semi autonomous modes Future generations however will likely feature increasingly sophisticated AI systems capable of autonomous target recognition engagement prioritization and even strategic decision making within pre defined parameters This increased autonomy will not only enhance the speed and efficiency of operations but will also enable UCAVs to react more swiftly to dynamic battlefield situations The integration of advanced data fusion algorithms will further enhance situational awareness enabling UCAVs to more effectively process and interpret data from multiple sources This will allow for a more comprehensive and accurate understanding of the battlefield enabling more informed decision making The integration of drones with autonomous vehicles such as self driving cars and trucks opens up yet another exciting area of collaborative autonomy While aerial drones dominate headlines the silent persistent operation of unmanned surface vessels USVs is quietly revolutionizing naval capabilities particularly in surveillance and mine countermeasures MCM The use of autonomous underwater vehicles AUVs in conjunction with USVs significantly enhances MCM capabilities The international implications of drone warfare are equally profound The use of drones by certain nations has powered international tensions and prompted accusations of violating national sovereignty The unilateral nature of drone strikes often carried out in the territories of other countries without explicit consent or notification has generated significant resentment and anger amongst affected

governments The impersonal nature of drone warfare often described as video game warfare can ironically amplify this moral injury as the lack of physical immediacy can create a psychological distance that prevents necessary emotional processing and resolution

Clinical Ethics in Anesthesiology Gail A. Van Norman, Stephen Jackson, Stanley H. Rosenbaum, Susan K. Palmer, 2010-10-28 Ethical issues facing anesthesiologists are more far reaching than those involving virtually any other medical specialty In this clinical ethics textbook authors from across the USA Canada and Europe draw on ethical principles and practical knowledge to provide a realistic understanding of ethical anesthetic practice The result is a compilation of expert opinion and international perspectives from clinical leaders in anesthesiology Building on real life case based problems each chapter is clinically focused and addresses both practical and theoretical issues Topics include general operating room care pediatric and obstetrical patient care the intensive care unit pain practice research and publication as well as discussions of lethal injection disclosure of errors expert witness testimony triage in disaster and conflicts of interest with industry An important reference tool for any anesthesiologist whether clinical or research oriented this book is especially valuable for physicians involved in teaching residents and students about the ethical aspects of anesthesia practice

Neurointerventions, Crime, and Punishment Jesper Ryberg, 2020 Can it be justified to use neuroscientific technologies for influencing the human brain as a means of preventing offenders from engaging in future criminal conduct In *Neurointerventions Crime and Punishment* Jesper Ryberg considers various ethical challenges surrounding this question
