Marcus Carter and Ben Egliston strip bare the tech industry's vision of a future dominated by immersive VR experiences challenging the utopian promises of this technology's potential. Carter and Egliston offer a critical account of VR in a variety of contexts from gaming to human resources to policing and the military. They argue that while VR does hold significant potential, the overhyped expectations surrounding it from achieving true empathetic understanding to transforming traditional education and office work are often overstated and fraught with issues of privacy control and exclusion. What's more, there is nothing truly virtual about virtual reality; VR is deeply entrenched in the material world driven by tangible technological, economic, and social logics. An accessible introduction to this emerging technology, *Fantasies of Virtual Reality* is essential reading for anyone interested in what VR can really do and what is just plain fantasy.
