Conceptualising Marketing Communication in the New Marketing Paradigm Wilson Ozuem, 2005 There has been a lot of interest among marketing practitioners and researchers in the concept of marketing communications as related to computer mediated marketing environments as a result of the commercialization of the World Wide Web WWW as a marketing and communication medium Despite growing interest there is a dearth of research on the processual nature of communication between marketers and consumers The overall aim of this study therefore is to expand our understanding of marketing communication within the computer mediated marketing environments This understanding is achieved in the thesis by incorporating ideas from traditional marketing communication models those based on a one way general outbound linear model in which marketers deliver communication to customers and prospects and contemporary marketing communications theory within a contextualist framework to examine the evolving marketing communication medium Given the growing empowerment of customers through information technology that has created the interactive marketplace the study aims to illuminate concretely that Internet exerts a mediating influence on the relationship between marketers and consumers Following this articulation the study considers computer mediated marketing environments as a technological development that increases the options for marketing communications Placing marketing communication and computer mediated marketing environments within a historical context of technology as consistent with social constructivist framework rather than thinking about the medium as an isolated phenomenon builds the base for understanding the opportunities and difficulties associated with marketing communications and the Internet in contrast to capabilities for marketing prior to the Internet The current study indicates that marketing communication in the computer mediated marketing environments possess some fundamental uniqueness which are ancillary and augment the consumption processes The study proposed a conceptual framework for understanding marketing communication trajectory in the evolving interactive marketplace The framework proposed provides a new base for developing a wide range of marketing communication programmes for practitioners and academic researchers

Maheu,Myron L. Pulier, Frank H. Wilhelm, Joseph P. McMenamin, Nancy E. Brown-Connolly,2004-09-22 In the last two decades new communication technologies have dramatically changed the world in which mental health professionals and their patients live Developments such as e mail online chat groups Web pages search engines and electronic databases are directly or indirectly affecting most people s routines and expectations Other developments are poised to do so in the near future Already for example patients are acquiring both good and bad advice and information on the Web many expect to be able to reach their therapists by e mail And already there is pressure from third party payers for providers to submit claims electronically These technological breakthroughs have the potential to make mental health care more widely available and accessible affordable acceptable to patients and adaptable to special needs But many mental health professionals as well as those who train them are skeptical about integrating the new capabilities into their services and question the ethical and legal appropriateness of doing so Those unfamiliar with the technologies tend to be particularly doubtful How much e mail contact with patients should I encourage or permit and for what purposes Why should I set up a Web site and how do I do so and what should I put on it Should I refer patients to chat groups or Web based discussion forums Could video conferencing be a helpful tool in some cases and what is involved How do I avoid trouble if I dare to experiment with innovations And last but not least will the results of my experimentation be cost effective The book includes an extensive overview of legal and regulatory issues such as those raised by the Health Insurance Portability and Accountability Act HIPAA concrete technical ethical and managerial suggestions summarized in a seven step Online Consultation Risk Management model and how to resource lists and sample documents of use to beginners and experienced professionals alike For better or worse no mental health professional today can avoid confronting the issues presented by the new technologies *The Mental Health Professional and the New Technologies A Handbook for Practice Today* will enormously simplify the job of thinking through the issues and making clinically ethically and legally prudent decisions
