The Future of Work Darrell M. West, 2018-05-15 Robots artificial intelligence and driverless cars are no longer things of the distant future They are with us today and will become increasingly common in coming years along with virtual reality and digital personal assistants As these tools advance deeper into everyday use they raise the question how will they transform society the economy and politics If companies need fewer workers due to automation and robotics what happens to those who once held those jobs and don t have the skills for new jobs And since many social benefits are delivered through jobs how are people outside the workforce for a lengthy period of time going to earn a living and get health care and social benefits Looking past today s headlines political scientist and cultural observer Darrell M West argues that society needs to rethink the concept of jobs reconfigure the social contract move toward a system of lifetime learning and develop a new kind of politics that can deal with economic dislocations With the U S governance system in shambles because of political polarization and hyper partisanship dealing creatively with the transition to a fully digital economy will vex political leaders and complicate the adoption of remedies that could ease the transition pain It is imperative that we make major

adjustments in how we think about work and the social contract in order to prevent society from spiraling out of control This book presents a number of proposals to help people deal with the transition from an industrial to a digital economy We must broaden the concept of employment to include volunteering and parenting and pay greater attention to the opportunities for leisure time New forms of identity will be possible when the job no longer defines people s sense of personal meaning and they engage in a broader range of activities Workers will need help throughout their lifetimes to acquire new skills and develop new job capabilities Political reforms will be necessary to reduce polarization and restore civility so there can be open and healthy debate about where responsibility lies for economic well being This book is an important contribution to a discussion about tomorrow one that needs to take place today

Education, Training and the Future of Work II Mike Flude,Sandy Sieminski,2013-10-18 This volume focuses on the recent changes in education and training policy mainly in the UK The considerable developments of past years and the ways in which they have affected both education and training are examined The contributors analyse the methods by which we educate our workforce and look closely at the kind of training now offered to those in work The chapters in this reader cover the role of the state how economic factors influence education national education and training policy the political factor Other countries including Germany are looked at and there is reflection on the ways in which the new industry led qualifications such as NVQs have fared There is careful analysis as to how much the political climate of the time influenced developments There is thorough research to back up claims made throughout the book and many practical examples are referred to What emerges is an incisive examination of current trends in education and the workplace
