Agents Of Revolution John And Thomas Gilbert Entrepreneurs:

Agents of Revolution Peter Lead,1992 **The Canal Builders** Anthony Burton,2015-11-30 Canal Builders is a classic history book for anyone interested in the development of Britain's canal system The book which was first published in the 1970s is now republished here in a new fifth edition It takes the reader from the middle of the eighteenth century to the start of the railway age in the early nineteenth century Anthony Burton has revised and improved the original text using new material that he has found in archives since it was first published and has added many extra illustrations This is the remarkable story of the many groups of people who were responsible for building Britain's canal system There were industrialists such as Josiah Wedgwood who promoted canals to help his own industry and speculators financed the projects in the hope of a good return The work was planned by engineers some of whom such as James Brindley and Thomas Telford have become famous while others have remained virtually unknown but still did magnificent work This is also the story of the great anonymous army of men who actually did the work the navvies This was the first book ever to study the lives of these labourers in detail Altogether it is an epic story of how the transport route that made the industrial revolution possible was built Well planned and well written There is no better introduction to the early canal age The EconomistLinks End Links

Author End Author **Biographical Dictionary of the History of Technology** Lance Day,Ian McNeil,2002-09-11 This Biographical Dictionary seeks to put the world of technology in the context of those who have made the most important contribution to it For the first time information has been gathered on the people who have made the most significant advances in technology From ancient times to the present day the major inventors discoverers and entrepreneurs from around the world are profiled and their contribution to society explained and assessed Structure The Dictionary presents descriptive and analytical biographies of its subjects in alphabetical order for ease of reference Each entry provides detailed information on the individual's life work and relevance to their particular field in the first part of the entry the information will include the dates and places of the subject's birth and death together with their nationality and their field of activity in the main body of the entry there follows an account of their principal achievements and their significance in the history of technology along with full details of appointments and honours finally an annotated bibliography will direct the reader to the subject's principal writings and publications and to the most important secondary works which the reader can consult for further information Special Features The first work in existence to examine technologists in detail Contains over 1 500 entries giving detailed information Extensive cross references enable the reader to compare subjects and build up a picture of technological advance Figures drawn from fields such as Aeronautics Telecommunications Architecture Photography and Textiles **English MPs** Michael W. McCahill,2023-01-26 What was the role of elected legislators Was it to represent the opinions of constituents or to vote according to their informed opinions reflecting the needs of the kingdom Most authorities have accepted Edmund Burke's depiction of 18th century MPs insisting it was their right to form their opinions without

reference to the instructions of constituents This study provides answers to these important questions and in doing so reveals that Burke's vision does not represent how the House of Commons functioned during the last two decades of the 18th century Rather than focusing on specific issues or demographic groups English MPs brings to the fore the legislative activity of a broad segment of late 18th century English MPs This book shows they were diligent legislators who attended to the needs of constituents in the process developing strong connections with them It demonstrates that these connections did not rest on shared beliefs in reformist ideologies except in and around the metropolis Instead they grew out of the members' timely and effective tending session after session to the host of measures brought forward by constituents and neighbours McCahill explores in fascinating detail the consequences of this bond In this book McCahill draws from an impressive array of primary sources and secondary literature to combine a structural analysis with broad surveys and detailed case studies The result is an illuminating and a comprehensive account of the House of Commons between 1760 and 1790 **The**

Genius of Erasmus Darwin Christopher Upham Murray Smith, Robert Arnott, 2005 The Genius of Erasmus Darwin provides insight into the full extent of Erasmus Darwin's exceptional intellect He is shown to be a major creative thinker and innovator one of the minds behind the late eighteenth century industrial revolution and one of the first if not the first to perceive the living world including humans as part of a unified evolutionary scenario The contributions here provide contextual understandings of Erasmus Darwin's thought as well as studies of particular works and accounts of the later reception of his writings In this way it is possible to see why the young Samuel Taylor Coleridge was moved to describe Darwin as the first literary character in Europe and the most original minded man Erasmus Darwin Charles Darwin's grandfather was one of the leading intellectuals of eighteenth century England He was a man with an extraordinary range of interests and activities he was a doctor biologist inventor poet linguist and botanist He was also a founding member of the Lunar Society an intellectual community that included such eminent men as James Watt and Josiah Wedgwood *Civil Engineering Heritage* Roger

Cragg, 1997-04-08 Part of the Heritage titles this illustrated book covers Wales and the Western part of central England from Cheshire in the north to just south of Bristol It describes many examples of civil engineering heritage and contains location maps and notes on access to sites and the achievements of famous names **British Canals** Joseph Boughey, Charles Hadfield, 2012-05-30 The first edition of British Canals was published in 1950 and was much admired as a pioneering work in transport history Joseph Boughey with the advice of Charles Hadfield has previously revised and updated the perennially popular material to reflect more recent changes For this ninth edition Joseph Boughey discusses the many new discoveries and advances in the world of canals around Britain inevitably focussing on the twentieth century to a far greater extent than in any previous edition of this book while still within the context of Hadfield's original work *The Trent and Mersey Canal* Ray Shill, 2021-05-24 The Trent and Mersey Canal first came into use in 1777 A vital transport link for the industries of the midlands indeed Josiah Wedgwood of the pottery was an early supporter it carried coal ironstone limestone merchandise

pottery and salt Despite the arrival of the railways and subsequently motorways the carriage of freight continued up until 1970 After inevitable decline various restoration programmes have been undertaken and the waterway is now popular with boaters A working waterway for 250 years the need to adapt to changing transport needs has been a constant factor in this canal s history With over 100 archive and present day photographs maps and plans the book describes the need for the canal and the key personnel who were involved in its inception Engineering and constructions of the canal and its branches are looked at in detail along with further improvements to the canal and how these boosted trade A century of ownership by railway companies subsequent nationalisation and later decline is discussed The book also looks at the people who lived and worked on the canal Finally restoration rejuvenation and the future of the canal is covered

James Brindley - Canal Pioneer Christine Richardson,2004 This is a biography of James Brindley the 18th century canal pioneer the age in which he lived and his leading role in the first moves towards a national network of inland waterways in Britain

A History of the County of Stafford Nigel J. Tringham,2013 Comprehensive and authoritative history of north west Staffordshire including Keele Trentham and Audley Covering the hilly north west part of the county from the Cheshire border to the valley of the river Trent south of Newcastle under Lyme this volume treats parishes that lie mostly on the North Staffordshire coalfield and where both coal and ironstone mining and iron making became important especially in the nineteenth century A rich archive has been used to illustrate the origins of this industrial activity in the Middle Ages when the area was characterised by scattered settlements with an important manorial complex and a grand fourteenth century church at Audley a hunting lodge for the Stafford lords at Madeley a small borough at Betley and at Keele and Trentham religioushouses which became landed estates with mansion houses after the Dissolution In the nineteenth century Trentham gained fame for its spectacular gardens created by the immensely rich dukes of Sutherland and Keele rose to prominence in 1950 as the site of Britain s first campus university After coalmining ceased in the twentieth century several villages and mining hamlets acquired large housing estates which in Trentham parish were absorbed into Stoke on Trent Nigel Tringham is a Senior Lecturer in History at Keele University with special responsibility for researching and writing the volumes of the Staffordshire Victoria County History
