Air Quality Management In The United States:

Air Quality Management in the United States National Research Council, Division on Earth and Life Studies, Board on Atmospheric Sciences and Climate, Board on Environmental Studies and Toxicology, Committee on Air Quality Management in the United States, 2004-09-30 Managing the nation's air quality is a complex undertaking involving tens of thousands of people in regulating thousands of pollution sources. The authors identify what has worked and what has not and they offer wide ranging recommendations for setting future priorities making difficult choices and increasing innovation. This new book explores how to better integrate scientific advances and new technologies into the air quality management system. The volume reviews the three decade history of governmental efforts toward cleaner air discussing how air quality standards are set and results measured the design and implementation of control strategies regulatory processes and procedures special issues with mobile pollution sources and more. The book looks at efforts to spur social and behavioral changes that affect air quality the effectiveness of market based instruments for air quality regulation and many other aspects of the issue. Rich in technical detail this book will be of interest to all those engaged in air quality management scientists engineers industrial managers law makers regulators health officials clean air advocates and concerned citizens. *Monthly Catalog of United States Government Publications*, 2004. **Monthly Catalogue, United States Public Documents**, 1982. Stern, 1974. *Air Quality Management in the United States* Committee on Air Quality Management in the United States, National Research Council (U.S.), 2004. Recognizing the central role that science and engineering plays in air quality management and anticipating the next congressional reauthorization of the Clean Water Act and its amendments the United States Congress directed the U.S. Environmental Protection Agency EPA to arrange for a study by the National Academy of Sciences 1 to evaluate from a scientific and technical perspective the effectiveness of the major air quality provisions of the Clean Air Act and their implementation by federal state tribal and local government agencies and 2 to develop scientific and technical recommendations for strengthening the nation's air quality management system with respect to the way it identifies and incorporates important sources of exposure to humans and ecosystems and integrates new understandings of human and ecosystem risks. In response the National Research Council established the Committee on Air Quality Management in the United States which prepared this report. Preface. *City of Evansville, Indiana V.
