Aging Coping With Medical Issues:

Therapeutic Activities for Children and Teens Coping with Health Issues Robyn Hart, Judy Rollins, 2011-05-03 Winner of the American Journal of Nursing Book of the Year 2011 Category Maternal And Child Health Building on children's natural inclinations to pretend and reenact play therapy is widely used in the treatment of psychological problems in childhood. This book is the only one of its kind with more than 200 therapeutic activities specifically designed for working with children and teenagers within the healthcare system. It provides evidence-based age-appropriate activities for interventions that promote coping. The activities target topics such as separation anxiety, self-esteem issues, body image, death, isolation, and pain. Mental health practitioners will appreciate its cookbook format with quickly read and implemented activities. Coping with Aging Richard S. Lazarus, Bernice N. Lazarus, 2006-01-19 Coping with Aging is the final project of the late Richard S. Lazarus, the man whose landmark book *Emotion and Adaptation* put the study of emotion in play in the field of psychology. In this volume, Lazarus examines the experience of aging from the standpoint of the individual rather than as merely a collection of statistics and charts. This technique is in line with his long-standing belief that experiences should be looked at in their specific contexts rather than squeezed into an overly general statistical viewpoint that loses the subjects' motivations. Drawing on his five decades of pioneering research, Lazarus looks at aging, emotion, and coping, and stability and change in both environment and personality. Because Lazarus mixes academic rigor with everyday examples, this volume will be both useful to scholars and accessible to the lay audience that has so much gain from a systematic understanding of aging and emotion. Readings in the Political Economy of Aging Meredith Minkler, Carroll Estes, 2019-03-19 Includes 16 essays which address many issues from a different perspective suggested by the experience of aging in America. This study explores the political, social, and economic realities which have an impact on Americans as they grow older. **Aging and Mental Health** Daniel L. Segal, Sara Honn Qualls, Michael A. Smyer, 2018-01-18 Fully updated and revised, this new edition of a highly successful text provides students, clinicians, and academics with a thorough introduction to aging and mental health. The third edition of *Aging and Mental Health* is filled with new updates and features, including the impact of the DSM 5 on diagnosis and treatment of older adults. Like its predecessors, it uses case examples to introduce readers to the field of aging and mental health. It also provides both a synopsis of basic gerontology needed for clinical work with older adults and an analysis of several facets of aging well. Introductory chapters are followed by a series of chapters that describe the major theoretical models used to understand mental health and mental disorders among older adults. Following entries are devoted to the major forms of mental disorders in later life, with a focus on diagnosis, assessment, and treatment issues. Finally, the book focuses on the settings and contexts of professional mental health practice and on emerging policy issues that affect research and practice. This combination of theory and practice helps readers conceptualize mental health problems in later life and negotiate the complex decisions involved with the assessment and treatment of those problems. Features new material on

important topics including positive mental health hoarding disorder chronic pain housing caregiving and ethical and legal concerns Substantially revised and updated throughout including reference to the DSM 5 Offers chapter end recommendations of websites for further information Includes discussion questions and critical thinking questions at the end of each chapter Aging and Mental Health Third Edition is an ideal text for advanced undergraduate and graduate students in psychology for service providers in psychology psychiatry social work and counseling and for clinicians who are experienced mental health service providers but who have not had much experience working specifically with older adults and their families
