Art Theory as Visual Epistemology Harald Klinke, 2014-06-26 How can we know What does knowledge mean These were the fundamental questions of epistemology in the 17th century In response to continental rationalism the British empiricist John Locke proposed that the only knowledge humans can have is acquired a posteriori In a discussion of the human mind he argued the source of knowledge is sensual experience mostly vision Since vision and picture making are the realm of art art theory picked up on questions such as are pictures able to represent knowledge about the world How does the production of images itself generate knowledge How does pictorial logic differ from linguistic logic How can artists contribute to a collective search for truth Questions concerning the epistemic potential of art can be found throughout the centuries up until the present day However these are not questions of art alone but of the representational value of images in general Thus the history of art theory can contribute much to recent discussions in Visual Studies and Bildwissenschaften by showing the historic dimension of arguments about what images are or should be What is knowledge is as much a philosophic question as What is an image Visual epistemology is a new and promising research field that is best investigated using an interdisciplinary approach that addresses a range of interconnected areas such as internal and external images and the interplay of producer and perceiver of images This publication outlines this territory by gathering together several approaches to visual epistemology by many distinguished authors

Rewriting Conceptual Art Michael Newman, Jon Bird, 1999-12 An international movement that developed along separate but parallel lines in Europe and America during the 1970s Conceptual Art grew out of the legacy of Marcel Duchamp Aiming to completely redefine the relationships between the production definition and ownership of artworks and their various audiences Conceptual artists rejected traditional formats media and definitions Instead they chose to address some of the key issues underlying modern life and art These included the gulf between initial idea and finished work the value assigned works of art in modern economies the role of women and of feminine creativity in general the politics of exhibition organization in short the ways art and the art world have been defined for centuries Among the notable figures whose work is discussed in essays ranging from the evaluative to the theoretical are Judy Chicago Robert Morris Sol LeWitt Marcel Broodthaers and Mary Kelly The influence of Conceptual Art continues to be felt today in the work of such controversial
