Agroindustrial Project Analysis Critical Design Factors:

Agroindustrial Project Analysis James E. Austin, Economic Development Institute (Washington, D.C.), 1992 Published for the World Bank by the Johns Hopkins University Press Provides a field tested analytical framework for systemically designing effective agroindustrial projects The agroindustry has become a vital economic sector in developing countries It not only supplies food fiber and exports but also provides jobs spurs infrastructure improvements and advances farming and manufacturing Agroindustrial Project Analysis has been a leading reference in this industry for more than a decade This second edition provides a field tested analytical framework for designing effective agroindustrial projects The framework includes the latest technical and managerial advances and presents a detailed conceptual approach that is used throughout the book Expanded chapters examine three main agroindustrial activities procuring raw materials processing and marketing The author uses field examples and current analyses to show what factors can make a project succeed or fail A new glossary of biotechnology terms has been added along with updated information on the costs and operating features common to food processing technologies This book has been written for private agribusiness managers officials in the public sector and analysts in development agencies Because both agriculture and industry are examined investors familiar with one of these areas will gain a more comprehensive understanding of the agroindustrial sector Agroindustrial Investment and Operations James G. Brown, 1994 Identifying developing and servicing markets The selection and evaluation of processing options Raw material supply Financial analysis of agroindustrial investments Managing the agroindustrial enterprise Socioeconomic evaluation of agroindustries *Guidelines for the Design of Agricultural Investment Projects* Food and Agriculture Organization of the United Nations, 1993-01-01 **Territorial tools for agro-industry development** Food and Agriculture Organization of the United Nations, 2018-08-09 This sourcebook appraises these instruments and considers their nature and objectives their potential benefits and challenges and the approaches used to implement them It also examines the practices that have led to both successful and unsuccessful outcomes The publication provides a comprehensive review of the potential of these tools to enhance value addition deliver jobs increase exports and provide markets for new and existing producers in the targeted territories It notes however that implementation of these tools poses a number of challenges For example planners and practitioners sometimes use them interchangeably thus ignoring the specificities of the investments policies and processes required and their expected outcomes The sourcebook concludes that these tools have potential for catalytic impact but planners need to make sound choices that respect demonstrated principles and follow good practices for effective design and implementation *The Economics of Project Analysis* William Augustus Ward, Barry J. Deren, 1991-01-01 The Economics of Project Analysis A Practitioner s Guide is written for project practitioners for instructors in agricultural project economic analysis and for students of that subject This guide extends and complements the discussion of project and policy economics contained in the second edition of Economic Analysis of Agricultural Projects by J Price

Outsource agrifood service MSMEs facilitating pivoting by fruits & vegetables farmers, wholesalers, and retailers

Reardon, Thomas, Awokuse, Titus, Liverpool-Tasie, Lenis Saweda O., Minten, Bart, Nguyen, Geneviève, Qanti, Sara, Swinnen, Johan, Vos, Rob, Zilberman, David, 2025-03-26 There is an important gap in the literature regarding evidence about the emergence of outsource agrifood services We contend that there are few studies on outsource services for differentiated product value chains particularly in developing countries To some extent also there is a knowledge gap regarding the use and effectiveness of eco certification and labeling compliance assisting services in developed countries The bulk of attention on outsource services is centered at the commodity phase such as with bulk grains and the modern stage and less attention is being paid to the product differentiation phase To fill these voids we focus on three country illustrations ranging in the product cycle phases from transitional to transitional modern to modern and from early differentiating case in Ethiopia on basic quality to intermediate differentiating case in Indonesia on advanced quality and variety differentiation in mangoes to advanced differentiating case in France on eco labeling and certification We focus on horticulture as it is rapidly growing and rapidly differentiating both in developed and developing countries We conclude that policies and public investments facilitating the formation of these services are important Importantly we found that without these emerging outsource services farmers would not have been able to be resilient to the shocks of market requirements and climate change

Privatization and Deregulation Sidhu, 2012-12-06 Agribusiness development has been constrained by distorted economic policies and institutional controls in the emerging market economies and in most of the developing countries In the former Soviet Union and Eastern Europe the agribusiness complex was dominated by state owned enterprises In many of the developing countries economic policies discriminated against agriculture and agribusiness The results have been obvious Despite major technological advances agriculture and agribusiness sectors in these economies remained inefficient A large share of the population particularly in the rural areas has not been able to improve household incomes and living standards The final decade of the 20th century will certainly be recorded as one of the most dynamic in modern history The restructuring of the former Soviet Union and Eastern Europe and market reforms in many of the developing countries are progressing at a rapid pace Agribusiness is key to economic performance in these areas in that agriculture is an important sector in many of these economies Economic transition to a market economy is presenting many challenges and opportunities to accelerate the process of agribusiness development which is so essential to alleviate rural poverty An international symposium organized by the International Fertilizer Development Center IFDC provided a unique opportunity to discuss needed policy reforms to promote efficient and competitive agribusiness development with a particular focus on privatization and deregulation

Transforming the Rural Nonfarm Economy Steven Haggblade, Peter B. R. Hazell, Thomas Reardon, 2007-11-16 Contrary to conventional wisdom that equates rural economies with agriculture rural

residents in developing countries often rely heavily on activities other than farming for their income. Indeed, nonfarm work accounts for between one third and one half of rural incomes in the developing world. In recent years, accelerating globalization, increasing competition from large businesses, expanding urban markets for rural goods and services, and greater availability of information and communication technology have combined to expose rural nonfarm businesses to new opportunities as well as new risks. By examining these rapid changes in the rural nonfarm economy, international experts explore how the rural nonfarm economy can contribute to overall economic growth in developing countries and how the poor can participate in this rapidly evolving segment of the economy. The authors review an array of recent studies of the rural nonfarm economy in order to summarize existing empirical evidence, explore policy implications, and identify future research priorities. They examine the varied scale, structure, and composition of the rural nonfarm economy as well as its relationship with agricultural and urban enterprises. And they address key questions about the role of public intervention in the rural nonfarm economy and how the rural poor can participate in and navigate the rapid transition underway in rural areas. The contributors offer new insights to specialists in rural development and to others interested in overall economic development.

Industrialisation and Rural Livelihoods in China Susanne Lingohr-Wolf, 2013-05-13. Since the mid 1990s, agricultural industrialisation (AI) has been advocated in China to promote rural development by integrating agriculture with the post-harvest sectors such as agro-processing and marketing. Large-scale Dragon-head enterprises (DHEs) and various forms of rural household associations (RAs) have been particularly promoted as AI organisational models. Drawing on the case study of the sweet potato sector in Sichuan Province, this book investigates their impact on rural livelihoods. Lingohr-Wolf analyses the forms of household linkages with AI organisations, the underlying household incentives to diversify both labour and agricultural production towards AI, and the developmental benefits and potential constraints that shape such rural involvement. By taking a rural household perspective on livelihood diversification, the analysis provides new insights into the links between rural household involvement in AI and the achievement of development objectives. It reveals that although there are significant beneficial effects, a number of challenges such as entry barriers and imbalances in bargaining power still need to be addressed to improve the positive impact of AI for rural development in China. As the first authoritative analysis of AI in China, this book is an essential read for scholars interested in economic development in China and rural development and agricultural economics more generally.

Prices, Products, and People Gregory J. Scott, 1995. The authors go beyond the traditional presentation of economic principles, offering instead a series of applied methods for data collection and analysis. Drawing on extensive experience in Africa, Asia, and Latin America, they not only describe specific procedures but also provide a wealth of illustrative research results. This book will be particularly useful to teaching professionals, development specialists, and applied researchers working in developing countries.
