Cavallaro, 2009-12-22 As noted in Volume I The Beginning of Futility after the Allies had induced Italy to join them against the Central Powers the Italian Army used the lives of its illiterate peasant fanti as coin advancing to finally endanger Austro Hungarian defenses By August 1917 Viennas generals were convinced that with German help they had to counterattack while Gen Eric Ludendorff was wary of giving assistance Finally he was won over after hearing a bold and daring plan later known as blitzkrieg Italian Intelligence warnings of an enemy offensive were discarded as it was too late in the year On October 24 1917 Austro German forces unleashed the first blitzkrieg battle of the century which the Italian Army as the Anglo French in France in May 1940 could not handle Using the four commandments of blitzkrieg deception infiltration isolation annihilation they quickly advanced 100 miles through the confused Italian defenses halting at the Piave River and adjacent mountains Unable to handle the assault many disheartened troops had fled but later with heroic deeds halted the enemy advance Notwithstanding the great victory Vienna was negotiating a separate peace with Lloyd George and President Woodrow Wilson both of whom who did not believe the Allies could win **Winged Warfare** Michael Paris, 1992 This original study provides a significant reinterpretation of the development of air power in Britain highlighting how in the period before 1914 aerial warfare was already becoming an increasingly forceful concept **United States Air Force History** Carl Berger, 1971 **Foundations of Russian Military Flight, 1885-1925** James K Libbey, 2019-05-15 Foundations of

Russian Military Flight focuses on the early use of balloons and aircraft by the Russian military. The best early Russian aircraft included flying boats designed by Dimitrii Grigorovich and large reconnaissance bombers created by Igor Sikorsky. As World War I began, the Imperial Russian Navy made use of aircraft more quickly than the army. Indeed, the navy established a precursor to the aircraft carrier. The Imperial Russian Army came to respect over time the work of aircraft that evolved from reconnaissance and bomber to fighter planes. Over 250 army pilots during the war received awards of high distinction for their wartime flights. After the 1917 revolution, both the new Bolshevik government and the reactionary White forces created air arms to combat each other. In the 1920s, the Soviet Union and Germany negotiated agreements that allowed Germany to violate the Treaty of Versailles by building military aircraft and training German military pilots in the USSR. This provided the Soviet Union access to the latest aviation technology and prevented them from falling too far behind the West in this crucial sphere.
