The Future of Planning Yvonne Rydin, 2013-09-11 For the past half century the planning system has operated on the basis of a growth dependence paradigm It has been based on market led urban development and has sought to provide community benefits from a share of development profits However we do not live in a world where growth can be

taken for granted and we are more aware than previously of the implications for well being and sustainability This timely book provides a fresh analysis of the limitations of the growth dependence planning paradigm It considers alternative urban development models ways of protecting and enhancing existing low value land uses and means of managing community assets within the built environment In each case it spells out the role that a reformed planning system could play in establishing a new agenda for planning The book will be of relevance to planning students planning professionals and planning academics as well as urban policy specialists more generally
