

The background of the entire slide is a sepia-toned photograph of a Harvard building. The building is a large, multi-story structure with many windows and arched doorways. In the foreground, there is a wide, light-colored walkway or path. Several people are walking along this path, moving away from the camera towards the building. There are trees and bushes on either side of the path, and the overall scene is peaceful and academic.

With Plates, Including Portraits.* Samuel Francis BATCHELDER, 1924 **Anglophilia** Elisa Tamarkin, 2008-11-15 Anglophilia charts the phenomenon of the love of Britain that emerged after the Revolution and remains in the character of U S society and class the style of academic life and the idea of American intellectualism But as Tamarkin shows this Anglophilia was more than just an elite nostalgia it was popular devotion that made reverence for British tradition instrumental to the psychological innovations of democracy Anglophilia spoke to fantasies of cultural belonging polite sociability and finally deference itself as an affective practice within egalitarian politics Tamarkin traces the wide ranging effects of anglophilia on American literature art and intellectual life in the early nineteenth century as well as its influence in arguments against slavery in the politics of Union and in the dialectics of liberty and loyalty before the civil war By working beyond narratives of British influence Tamarkin highlights a more intricate culture of American response one that included Whig elites college students radical democrats urban immigrants and African Americans Ultimately Anglophila argues that that the love of Britain was not simply a fetish or form of shame a release from the burdens of American culture but an anachronistic structure of attachment in which U S Identity was lived in other languages of national expression
