Observatories in Britain and Ireland Roger Durman,1976 **Bird Observatories of Britain and Ireland** Mike Archer,Mark Grantham,Peter Howlett,Steven Stansfield,2010 **The Atlas of Wintering Birds in Britain and Ireland** Peter Lack,2010-11-30 This companion volume to The Atlas of Breeding Birds of Britain and Ireland is derived from surveys of birds present in Britain and Ireland during the three winters 1981 82 1982 83 and 1983 84 The surveys were organised by the British Trust for Ornithology and the Irish Wildbird Conservancy as were the earlier breeding birds surveys The Winter Atlas maps 200 species 192 of which have full page two colour maps faced by a page of text The texts written by over 100 specialists comment on the survey results the species generally and the distribution and abundance as mapped In addition there are introductory chapters on the maps the weather in the three winters bird patterns and movements and appendices describing the planning organisation field methods and processing of the survey data from record cards to computer output and maps A team of 23 artists led by Robert Gillmor has provided the line drawings which head the species accounts

Enjoying Ornithology Ronald Hickling,2010-11-30 In the year 1983 the British Trust for Ornithology celebrated its first 50 years This volume records much of the history of birdwatching and ornithology since the early 1930s The book is not a

history of the BTO but many of the Trust's achievements helped fashion the development and direction of ornithology over the decades and major aspects of the Trust's work rightly have detailed treatment. The book ranges widely: it looks at the changing bird as well as the changing bird watcher and records the work of related conservation bodies; it considers the future and the past and includes an extensive section of useful facts and figures whilst never losing sight of the central theme which is the book's title.

Monitoring Ecological Change Ian F. Spellerberg, 1991-10-25 Living communities are continuously changing both as a result of natural processes and of human activities. It is essential for us to have effective biological and ecological monitoring programs in order to detect these changes and understand the factors that influence them. In the first part of the book the roles of local, national and international organizations that implement monitoring programs are discussed and assessed. In the second section of the book a wide range of examples are used to explain and evaluate methods of data collection, analysis and interpretation. The final section focuses on the important applications of biological monitoring such as pollution control, land use management, monitoring rare species and post environmental impact assessment.

A Bird in the Bush Stephen Moss, 2013-07-25 This journey through the world of birdwatchers is a wonderful book, fascinating, often hilarious, anecdotes and information. Daily Mail Critic's Choice. Scholarly, authoritative and above all supremely readable. Stephen Moss's book is the first to trace the fascinating history of how and why people have watched birds for pleasure from the beginnings with Gilbert White in the eighteenth century through World War II POWs watching birds from inside their prison camp and all the way to today's twitchers with their beeping pagers driving hundreds of miles for a rare bird. Proves that birdwatchers can be as instructive to watch as birds. Sunday Times Thoroughly researched and well written. The Guardian Moss knows his subject intimately and writes about it with just the right mixture of affection and occasional quizzicality. Sunday Telegraph It would be difficult to imagine anyone producing a more comprehensive, thoughtful, intelligent and entertaining examination of how people have watched birds at each point in history. In fact it is one of the few books which might prove such compulsive reading that even a dedicated twitcher might forgo a day in the field to stay at home to finish it. Birding World

Birds in Ireland Clive Hutchinson, 2010-10-30 Birdwatching has become an increasingly popular pastime in Ireland as elsewhere. Nor is all of the birdwatching done by the Irish. Many professional ornithologists from Britain and Western Europe find good reason to study Ireland's birds as do the numerous birdwatching visitors each year. Clive Hutchinson, a leading Irish ornithologist, has compiled this comprehensive review of birds in the Republic and Northern Ireland to coincide with the 21st anniversary year of the Irish Wildbird Conservancy's foundation and he has had the IWC's active support throughout. Knowledge about the status and distribution of birds in Ireland has increased greatly since the 1960s and this is reflected in the detailed species accounts which form the major part of the book. Factors which led to this greater knowledge, recent changes in bird distribution and status and reasons for the absence of some species are topics discussed in the book's introductory chapters. Other subjects covered are Ireland's topography, climate and habitats, a

review of ornithology and ornithologists in Ireland over the last 100 years and conservation programmes of more recent times John Busby's superb illustrations more than 100 are a feature of the book helping to set the Irish scene as well as depict its birds
