The African American Experience Arvarh E. Strickland, Robert E. Weems Jr., 2000-11-30 Compared to the early decades of the 20th century when scholarly writing on African Americans was limited to a few titles on slavery Reconstruction and African American migration the last thirty years have witnessed an explosion of works on the African American experience With the Civil Rights and Black Power movements of the 1960s came an increasing demand for the study and teaching of African American history followed by the publication of increasing numbers of titles on African American life and history This volume provides a comprehensive bibliographical and analytical guide to this growing body of literature as well as an analysis of how the study of African Americans has changed

White Lies Christopher M. Driscoll, 2015-10-23 White Lies considers African American bodies as the site of cultural debates over a contested white religion in the United States Rooting his analysis in the work of W E B DuBois and James Baldwin Christopher Driscoll traces the shifting definitions of white religion from the nineteenth century up to the death of Michael Brown and other racial controversies of the present day He engages both modern philosophers and popular imagery to isolate the instabilities central to a white religion including the inadequacy of this framing concept as a way of describing and processing death The book will be of interest to students and scholars interested in African American Religion philosophy and race and Whiteness Studies

Religion, and the Quest for African American Justice Daniel A. Morris,2025-06-26 This study argues that Black calls for force in the struggle against white supremacy have echoed concepts and principles in the Western just war tradition After establishing that just war theory has ignored Black calls for force and that the Trans Atlantic Slave Trade relied on just war ethics for its justification this book turns to African American resistance rhetoric in three crucial periods of U S history In the antebellum period the Civil Rights movement and the era of mass incarceration African American thinkers have drawn on ideas and forms of logic that run parallel to just war ethics This makes Black rhetoric of forceful resistance morally normal rather than radical or extremist Figures in the Black just war tradition such as David Walker Henry Highland Garnet Harriet Tubman Huey Newton Bree Newsome and others should be included in the discipline of just war ethics and white American Christians should recognize that their endorsements of force are consistent with widely accepted moral positions

Philosophy of African American Studies Stephen Ferguson,2015-09-16 In this ground breaking book Stephen C Ferguson addresses a seminal question that is too often ignored What should be the philosophical basis for African American studies The volume explores philosophical issues and problems in their relationship to Black studies Ferguson shows that philosophy is not a sterile intellectual pursuit but a critical tool to gathering knowledge about the Black experience Cultural idealism in various forms has become enormously influential as a framework for Black studies Ferguson takes on the task of demonstrating how a Marxist philosophical perspective offers a productive and fruitful way of overcoming the limitations of idealism Focusing on the hugely popular Afrocentric school of thought this book s engaging discussion shows that the foundational arguments of cultural idealism are based on a series of analytical and historical misapprehensions In turn Ferguson argues for the centrality of the Black working class both men and women to Black Studies
