Africa by creating new opportunities and challenges. It argues that contrary to global fears of worker displacement by new technologies, African countries can develop an inclusive future of work with opportunities for lower skilled workers. Harnessing these opportunities is however contingent on implementing policies and making productive investments in four main areas. These are enabling inclusive digital technologies, building human capital for a young rapidly growing and largely low skilled labor force, increasing the productivity of informal workers and enterprises, and extending social protection coverage to mitigate the risks associated with disruptions to labor markets. This companion report to the World Bank's World Development Report 2019 concludes with important policy questions that should guide future research whose findings could lead to more inclusive growth for African nations.
