Animals And Women Feminist Theoretical Explorations:

Animals and Women Carol J. Adams, Josephine Donovan, 1995-11-14 *Animals and Women* is a collection of pioneering essays that explores the theoretical connections between feminism and animal defense. Offering a feminist perspective on the status of animals, this unique volume argues persuasively that both the social construction and oppressions of women are inextricably connected to the ways in which we comprehend and abuse other species. Furthermore, it demonstrates that such a focus does not distract from the struggle for women's rights but rather contributes to it. This wide-ranging multidisciplinary anthology presents original material from scholars in a variety of fields as well as a rare early article by Virginia Woolf. Exploring the leading edge of the species/gender boundary, it addresses such issues as the relationship between abortion rights and animal rights, the connection between woman-battering and animal abuse, and the speciesist basis for much sexist language. Also considered are the ways in which animals have been regarded by science literature and the environmentalist movement. A striking meditation on women and wolves is presented, as is an examination of sexual harassment and the taxonomy of hunters and hunting. Finally, this compelling collection suggests that the subordination and degradation of women is a prototype for other forms of abuse and that to deny this connection is to participate in the continued

The Ethics of Fur Andrew Linzey, Clair Linzey, 2023-07-24 This is the first multidisciplinary book that addresses the ethics of fur Whatever might have been true of the past the production of fur is now morally problematic in terms of both necessity and suffering There is no necessity in killing animals for nonessential purposes such as adornment fashion or vanity The argument for utility simply doesn't hold up Alternative clothing is now readily available enduring and less costly Worse still since we know that the animals exploited are sentient causing them suffering or making animals liable to suffering is arguably intrinsically wrong The purpose of this volume is to open up and advance further the ethical political and specifically legislative endeavors now moving at pace and to encourage the anti fur movement That said there is much to learn from this book about the history culture and political arguments for and against fur that should interest scholars and students as well as those engaged on either side of the debate It is not common for academics to engage with pressing and contentious moral issues and we pay tribute to our eighteen contributors for leading the way

Making Sense of 'Food' Animals Paula Arcari, 2019-09-04 This book addresses the persistence of meat consumption and the use of animals as food in spite of significant challenges to their environmental and ethical legitimacy Drawing on Foucault's regime of power knowledge pleasure and theorizations of the gaze it identifies what contributes to the persistent edibility of food animals even and particularly as this edibility is increasingly critiqued Beginning with the question of how animals and their bodies are variously mapped by humans according to their use value it gradually unpacks the roots of our domination of food animals a domination distinguished by the literal embodiment of the other The logics of this embodied domination are approached in three inter related parts that explore respectively how knowledge sensory and emotional associations and visibility work together to render animal's bodies as edible flesh The book concludes by exploring how to more effectively challenge the entitled gaze that maintains food animals as persistently edible
