Combating Climate Change: A helpful guide on personal carbon footprinting Gopalakrishnan Ravichandran, Prof. Seeram Ramakrishna, 2021-12-15 Climate change is a hot topic these days as it makes our earth a hotter place to live in. Almost all the countries are working on their climate policy to do their part in reducing carbon emissions. Many global conferences and events have been happened in the past 50 years to control the global temperature rise. But still there is no evidence of significant improvement in reducing our global carbon emissions. Some of you might have thought about your role in combating climate change. To answer this we came up with this book which will help you to understand your carbon footprint and the possible ways to reduce the same. We have covered some of the products, events and activities in this book with which you can find the carbon footprint of the products which aren't covered in this book. Citation: Ravichandran Gopalakrishnan and Seeram Ramakrishna. *Combating Climate Change: A helpful guide on personal carbon footprinting*. Gopalakrishnan Ravichandran, 2021. [The Carbon Footprint of Everything](#) Mike Berners-Lee, 2022-04-26 I can't remember the last time I read a book that was more fascinating and useful and enjoyable. Bill Bryson. *Reduce your carbon footprint and understand the issue with this up to date life guide for carbon conscious readers*. Kirkus. Calculate your carbon footprint with an item by item breakdown. Meet your company's carbon goals using the latest research. Covid 19 and the carbon battle. Understand the new global supply chain. *The Carbon Footprint of Everything* breaks items down by the amount of carbon they produce, creating a calorie guide for the carbon conscious. With engaging writing, leading carbon expert Mike Berners-Lee shares new carbon calculations based on recent research. He considers the impact of the pandemic on the carbon battle, especially the embattled global supply chain and adds items we didn't consider a decade ago like bitcoin and other cryptocurrencies. Supported by solid research, cross-referenced with other expert sources, illustrated with easy-to-follow charts and graphs and written with Berners-Lee's trademark sense of humor, *The Carbon Footprint of Everything* should be on everyone's bookshelf. *The Carbon Footprint of Everything* is an extensively revised and updated edition of *How Bad Are Bananas*. *Our Carbon Footprint* Carol Sutters, 2021-02-28 Book is suitable for 6-11 year old. In this book the children learn more about our carbon footprint and the carbon cycle. They find out about UK and United Nations plans to produce net carbon zero emissions by 2050.
