Education, Training and the Future of Work I John Ahier,Geoff Esland,2013-10-18 A central claim of this volume is that public policy in education and training can only be properly understood if it is seen in relation to prevailing economic and employment conditions It has become increasingly apparent that the neo liberal economic policies pursued by Western governments during the 1980s and 1990s have led to a growing world wide work crisis Unemployment levels particularly in Europe remain persistently high and for those in employment job insecurity and long working hours have become the norm The response of UK governments has been to promote flexibility in employment practices while proclaiming the importance of improving skill levels through education and training This volume challenges the adequacy of such an approach and asks whether reliance on education and training reforms without additional political intervention in economic processes is capable of reversing current trends Issues covered in this reader include the impact of globalization on employment trends neo liberal and neo Keynesian approaches to employment policy political reforms in education and training institutions the impact of flexibilization on private life and the family The two volumes in this series are readers for the Open University course Education Training and the Future of Work E837 a module of the MA in Education The companion volume is Education Training and the Future of Work II Developments

in Vocational Education and Training John Ahier is Lecturer in Education at the Open University Geoff Esland is Director of the Centre for Sociology and Social Research at the Open University and Course team Chair of E837 Digital Innovation and the Future of Work Hans Schaffers, Matti Vartiainen, Jacques Bus, 2022-09-01 The concept of digitalization captures the widespread adoption of digital technologies in our lives in the structure and functioning of organizations and in the transformation of our economy and society Digital technologies for data processing and communication underly high impact innovations including the Internet of Things wireless multimedia artificial intelligence big data enterprise platforms social networks and blockchain These digital innovations not only bring new opportunities for prosperity and wellbeing but also affect our behaviors activities and daily lives They enable and shape new forms of production and new working practices in sectors such as manufacturing healthcare logistics and supply chains energy and public and business services Digital innovations are not purely technological but form part of comprehensive systemic innovations of a sociotechnical and networked nature requiring the alignment of technology processes organizations and humans Examples are platform based work customer driven value creating networks and urban public service systems Building on widespread networking algorithmic decisions and sharing of personal data these innovations raise intensive societal and ethical debates regarding key issues such as data sovereignty and privacy intrusion business models based on data surveillance and negative externalization quality of work and jobs and market dominance versus regulation In this context this book focuses on the implications of digitalization for the domain of work The book studies the changing nature of work as well as new forms of digitally enabled organizations work practices and cooperation The book sheds light on the technological economic and political forces shaping the new world of work and on the prospects for human centric and responsible innovations
