## Abstract

This theoretical paper aims to explore the concept of the humanistic approach in the field of teacher education. Humanistic education is concerned with the study of learners' emotions, knowledge, and experiences involved in their learning process. According to this approach, students should be viewed as “humans,” not as “machines” as they are the most crucial part of the education system. The curriculum and syllabus should focus on the students' interests, needs, and overall learning circumstances. In humanistic teaching, students are perceived as active beings, not “robots” who are supposed to follow the teacher's orders without any justification or challenge. Teachers' roles in humanistic education are to cater support to the students considering several learner factors and guiding them to reach the highest point of autonomous learning. Therefore, the humanistic approach needs to be adapted in the academic field for ensuring practical learning and mutual respect between teachers and students. The paper is organized into three sections. First, it explores the origin and evolution of the humanistic movement in education. Secondly, a detailed account of the basic principles and teacher roles in humanistic education is provided. Finally, the paper discusses its implications in ELT and existing complications regarding this approach.

**Keywords:** humanistic education, machines, learner autonomy

## Introduction

The concept of humanistic education has become prominent worldwide over the last three decades. It originated from Humanistic Psychology, which investigates human behavior, feelings, and the nature of motivation from a holistic point of view. It intends to value the essence of a human and recognizes their specific personal needs. Humanistic education stresses the importance of the learner's inner world and puts the person's thoughts, feelings, and emotions at the focal point of human development (Lei, 2007). The major aim of the humanistic approach is to emphasize the needs and independence of the students and ensure flexibility and mutual support on the part of teachers. Thus, the notion of humanistic teaching advocates treating learners as living beings, not as “lifeless objects.” The overall learning environment should make the learners confident, enthusiastic, and motivated for

*Buber and Humanistic Education* Joshua Weinstein, 1975-06-01      Every Person's Guide to Jewish Philosophy and Philosophers Ronald H. Isaacs, 1999 REL This new volume in Rabbi Ronald H Isaacs's Every Person's Guide to series is precisely what the title claims it to be It describes not philosophy in its narrow meaning but the general principles of Jewish religion as well as some philosophical issues expressed in the religious writings or derived from the theological doctrines Notable for its inclusiveness this work starts from biblical philosophical or para philosophical ideas and continues in chronological order to explicate the main views of Jewish theologian philosophers through the ages right up to Emil Fackenheim At the end the basic premises of different branches of Judaism are described with the notable absence of secular Judaism political philosophy and the different factions of Zionism Several philosophers have been excluded e g Emanuel Levinas and Yehuda Alkalai though some of the omitted philosophers are included in the Glossary of Philosophic Terms The book lacks scholarly apparatus but it can serve as a guide for beginners studying Jewish philosophy and for undergraduates both as an introductory and reference work Hayim Y Sheynin Gratz Coll Lib Melrose Park PA      **New Perspectives in Philosophy of Education** David Lewin, Alexandre Guilherme, Morgan White, 2014-10-23 New Perspectives in Philosophy of Education seeks to build a bridge between philosophical reflection and socio political action by developing a range of critical discussions in the areas of ethics politics and religion This volume brings together established authorities and a new generation of scholars to ask whether philosophy of education can contribute to political and social discourse or whether it is destined to remain the marginal gadfly of mainstream ideology The philosophy of education stands in danger of becoming a neglected field at precisely the moment we need to be able to reflect upon the increasingly apparent costs of the technocratic attitude to education While many of the educational policy discussions of recent years seem far reaching and radical critical debate surrounding these initiatives remain largely at a populist level New Perspectives in Philosophy of Education provides contemporary responses to philosophical issues that bear upon educational studies policies and practices contributing to the debate on the role of philosophy of education in an increasingly fractured intellectual milieu      **The Paper Bag Players, a Theatre for Children, 1958-1982** Georga Larsen Parchem, 1983      *Ilan Gur-Ze'ev and Education* Alexandre Guilherme, 2019-12-06 Ilan Gur Ze ev and Education Pedagogies of Transformation and Peace critically analyses and introduces the main ideas of Ilan Gur Ze ev reflecting on his continuing theoretical and practical relevance to the field of education This book offers an accessible higher level critical discussion on the thought of Ilan Gur Ze ev with an impressive breadth and contemporary focus The book focuses on Gur Ze ev's counter pedagogy project which brought him much attention and attempts to establish an alternative and non dogmatic form of education Gur Ze ev's views go against critical pedagogy and neoliberalism because while the former advocates achieving a utopia in which there is no oppression the latter defends the idea that wants and desires need to be satisfied through a process of marketisation This book brings to notice

Gur Ze ev s concepts of counter education and diasporic education which seek to pursue the truth in everyday life rather than achieving a utopian goal or the promised land This unique and up to date monograph will be of great interest for researchers academics and postgraduate students in the fields of philosophy of education theory of education peace education Jewish education neoliberalism and sociology of education     Martin Buber's Myth of Zion S. Daniel Breslauer,2019-03-14 The book provides an insightful study of the Jewish theologian Martin Buber and combines a review of the unconventional Zionism he proposed with a sensitivity to myth as the basis of an inclusive civil religion The multifaceted nature of this work examines Buber s embrace of myth and his application of myth to both biblical studies and political theory It pays special attention to the way Buber s thinking about Zion applied to religious ethical issues such as ecology education ritual and as a continuing theme throughout the book to the conflict between those Buber called Jews and Arabs in the land of Palestine     **Learning Through Dialogue** Kenneth Paul Kramer,2013-04-08 Educational practice today often fails to make the crucial distinction between learning as an accumulation of information and learning as a dialogical interaction that elicits one s personal response to the material Learning Through Dialogue offers an alternative approach to teaching and learning which utilizes Martin Buber s dialogical principles turning toward addressing affirmatively listening attentively and responding responsibly The book first presents Buber s educational theory and method and second presents specific examples of how Buber s dialogical philosophy can be applied in the classroom Rather than imposing one s own views this approach enables teachers and students to develop course content in uniquely appropriate ways If you are a teacher a student an educator at any level or anyone interested in furthering his or her ability to engage more meaningfully with the educational process this book will challenge you with fresh perspectives     Martin Buber's Social and Religious Thought Laurence J. Silberstein,1990-12 Moore focuses on Buber s central message about what it means to be a human being a person of faith and what mankind can do to overcome the eclipse of God Shofar Solid well researched and sympathetic might well spur a person to go back and read Buber Commonwealth     **Redemptive Hope** Akiba J. Lerner,2015-09-01 This is a book about the need for redemptive narratives to ward off despair and the dangers these same narratives create by raising expectations that are seldom fulfilled The quasi messianic expectations produced by the election of President Barack Obama in 2008 and their diminution were stark reminders of an ongoing struggle between ideals and political realities Redemptive Hope begins by tracing the tension between theistic thinkers for whom hope is transcendental and intellectuals who have striven to link hopes for redemption to our intersubjective interactions with other human beings Lerner argues that a vibrant democracy must draw on the best of both religious thought and secular liberal political philosophy By bringing Richard Rorty s pragmatism into conversation with early twentieth century Jewish thinkers including Martin Buber and Ernst Bloch Lerner begins the work of building bridges while insisting on holding crucial differences in dialectical tension Only such a dialogue he argues can prepare the foundations for modes of redemptive thought fit for the twenty first century     *Mathematics*

*Education within the Postmodern* Margaret Walshaw, 2004-06-01 This timely and accessible book presents a challenge to accepted wisdoms about both the nature of mathematics and of education The authors of this groundbreaking volume bring to bear on this intersection a postmodern sensibility that engages with the grand narratives of mathematics education Thus they provide a key resource for rethinking theory and practice in mathematics education Each of the chapters develops important insights for mathematics education from mainly French intellectuals of the past Foucault Lacan Lyotard Deleuze Each chapter addresses issues relevant to mathematics education researching and teaching mathematics
