Brown ,2002 **Letters from the Corporation of Brown University** Lauren Zalaznick,2024-09-03 A profound and captivating chronicle of American higher education seen through the eyes of those at its helm it s a must read Xochitl Gonzalez New York Times bestselling author of *Olga Dies Dreaming* and *Anita de Monte Laughs Last* It s moving to see all these civic minded people so many of them people who d felt like outsiders when they arrived as students joining together in common cause What a powerful experience they all seemed to have had Ira Glass Host and Executive Producer of *This American Life* From the archives of Brown University this collection of letters tells a story of progress and passion in American higher education from a never before seen perspective Since the school s founding the trustees and fellows of the Corporation of Brown University have written resignation letters as they complete their terms From the quill and ink manuscripts of Brown s founders to the emails of today the letters are wise witty and heartfelt Many also reflect the country s social cultural and political transformations Presented as a curated collection for the first time these letters from members of Brown s highest governing body provide a unique glimpse into the evolution of the institution s enduring traditions and help inform our perspectives on the range of issues with which the University still grapples The Corporation members personal reflections yield insights into what it means to lead through societal changes helping to build bridges to future generations This rich tapestry of accounts spans more than two and a half centuries from 1764 to 2023 It includes an entry from a trustee who was admitted as an undergraduate despite being unable to even afford the application fee reflections from another who spearheaded the adoption of Brown s groundbreaking Open Curriculum and several letters from firsts including the first woman to serve as an Alumnae Trustee This is a book designed to be looked at as well as read Many of the letters are textured reproductions from original manuscripts to modern faxes Others are accompanied by archival photos of the seminal events they describe from commencements to campus protests All present a previously untold story about the leaders of one of the country s oldest and most influential institutions These profound human stories speak to the grand ambition of leading lives of usefulness and reputation as set forth in the preamble to the University s Charter of 1764 The ultimate power of the collection comes from recognizing that we cannot know each other s stories until we take the time to listen Columbus Laurence Bergreen,2012-09-25 He knew nothing of celestial navigation or of the existence of the Pacific Ocean He was a self promoting and ambitious entrepreneur His maps were a hybrid of fantasy and delusion When he did make land he enslaved the populace he found encouraged genocide and polluted relations between peoples He ended his career in near lunacy But Columbus had one asset that made all the difference an inborn sense of the sea of wind and weather and of selecting the optimal course to get from A to B Laurence Bergreen s energetic and bracing book gives the whole Columbus and most importantly the whole of his career not just the highlight of 1492 Columbus undertook three more voyages between 1494 and 1504 each designed to demonstrate that he could sail to China within a matter of weeks and convert those he found there to

Christianity By their conclusion Columbus was broken in body and spirit a hero undone by the tragic flaw of pride If the first voyage illustrates the rewards of exploration this book shows how the subsequent voyages illustrate the costs political moral and economic

The Spatial Reformation Michael J. Sauter, 2019-01-11 In *The Spatial Reformation* Michael J Sauter offers a sweeping history of the way Europeans conceived of three dimensional space including the relationship between Earth and the heavens between 1350 and 1850 He argues that this spatial reformation provoked a reorganization of knowledge in the West that was arguably as important as the religious Reformation Notably it had its own sacred text which proved as central and was as ubiquitously embraced Euclid's *Elements* Aside from the Bible no other work was so frequently reproduced in the early modern era According to Sauter its penetration and suffusion throughout European thought and experience call for a deliberate reconsideration not

only of what constitutes the intellectual foundation of the early modern era but also of its temporal range The Spatial Reformation contends that space is a human construct that is it is a concept that arises from the human imagination and gets expressed physically in texts and material objects Sauter begins his examination by demonstrating how Euclidean geometry when it was applied fully to the cosmos estranged God from man enabling the breakthrough to heliocentrism and by extension the discovery of the New World Subsequent chapters provide detailed analyses of the construction of celestial and terrestrial globes Albrecht Dürer's engraving Melencolia the secularization of the natural history of the earth and man and Hobbes's rejection of Euclid's sense of space and its effect on his political theory Sauter's exploration culminates in the formation of a new anthropology in the eighteenth century that situated humanity in reference to spaces and places that human eyes had not actually seen The Spatial Reformation illustrates how these disparate advancements can be viewed as resulting expressly from early modernity's embrace of Euclidean geometry The American Revolution DK,2016-04-05

England Arthur Scherr,2016-10-05 Writers often depict Thomas Jefferson as a narrow minded defender of states rights and Virginia s interests despite his authorship of the Declaration of Independence and vigorous defense of the young republic s sovereignty Some historians claim he was particularly hostile to the New England states whose Federalist electorate he regarded as enemies of his Democratic Republican Party This study of Jefferson s lifelong relationship with New England reveals him to be a consistent nationalist and friend of the region from his first visit to Boston in 1784 to his recruiting of Massachusetts scholars to teach at the University of Virginia His nationalist point of view is most evident where some historians claim to see it least in his opinions of the people and politics of New England He admired New Englanders Revolutionary patriotism especially that of his friend John Adams and considered their direct democracy and town meeting traditions a model for the rest of the Union

Christian Images and Their Jewish Desecrators Katherine Aron-Beller,2024-01-09 In Christian Images and Their Jewish Desecrators historian Katherine Aron Beller analyzes the common Christian charge that Jews habitually and compulsively violated Christian images identifying this allegation as one that functioned alongside other anti Jewish allegations such as ritual murder blood libel and host desecration to ultimately inform dangerous and long lasting prejudices in medieval and early modern Europe Through an analysis of folk tales myths legal proceedings and religious art Aron Beller finds that narratives alleging that Jews committed violence against images of Christ Mary and the disciples flourished in Europe between the fifth and seventeenth centuries She then explores how these narratives manifested differently across the continent and the centuries finding that their potency reflected not Jewish actions per se but Christians own concerns about slipping into idolatry when viewing depictions of religious figures In addition Aron Beller considers Jews own attitudes toward Christian imagery and the ways in which they responded to and rejected or embraced such allegations By examining how desecration allegations affected Jewish individuals and communities spanning Byzantium medieval England France Germany and early modern Spain and Italy Aron Beller demonstrates that this charge was a powerful expression of the Christian majority s anxiety around committing idolatry and their eagerness to participate in practices of veneration that revolved around visual images an anxiety that evolved through the centuries and persists to this day
