Biohack Like a Woman Aggie Lal,2024-09-26 THE INTERNATIONAL BESTSELLER AND LIFE CHANGING GUIDE Biohack Like a Woman written by health coach and biohacker Aggie Lal is a revolutionary approach to

weight loss and biohacking that's made by a woman for women. We live in a world where women are bombarded with weight loss information from every angle. However, most of that information is created by men that see shedding pounds from a male perspective. They don't take into account the most important variable to us women: our Infradian Rhythm. Enter *Biohack Like a Woman*, a tailor-made way for you to lose all the weight you desire. Not by counting calories but by biohacking your Infradian Rhythm, otherwise known as your 28-day cycle. As you probably know, our cycles regulate our hormones, and hormones regulate our hunger, fat burning, energy levels, sleep quality, and mood. When we go on restrictive diets or bust our asses in the gym without being mindful of our hormones, we are going against our own body's rhythm. This is not a recipe book; this is not an exercise routine; this isn't even a diet book. It's a blueprint on how to listen to your Infradian Rhythm and adapt the information you'll discover in the book to your own special circumstances, which you can customize to you and your needs. And best of all, you won't have to change your diet or lifestyle to achieve your goals because one of the key things you'll find out when you read the book is that when and how you eat is more important than what you eat. Best part: *Biohack Like a Woman* comes with a trained AI coach to help you digest everything in the book and help you better calibrate the biohacking protocol to your unique needs.

BIOHACKING: The Science of Self-Optimisation Ralph Denner, 2025-03-25 Humans are no longer just the product of their genes and environment; they are becoming the designers of their own biology. Biohacking combines the latest findings from genetics, neuroscience, nutritional medicine, and longevity research to take health, performance, and well-being to a new level. It's not for nothing that Elon Musk is also involved in this. But what is behind the promises of targeted self-optimisation? This book provides a scientific analysis of the methods and technologies we can use to actively influence our body and mind, from epigenetics and nootropics to cold therapy and personalised nutrition. It shows which mechanisms limit our biological potential and how we can overcome them in a targeted way. It not only highlights the opportunities but also the risks of this rapidly growing movement. Are we ready to hack our biology? This book provides well-founded answers and a glimpse of a future in which the boundaries of the possible are pushed further and further.
