Biology And Biological Technology Pt 6 Medicine:

Multicivilizational Exchanges in the Making of Modern Science Arun Bala, Raymond W. K. Lau, Jianjun Mei, 2024-09-09

This book explores how and why exchanges across civilizations have come to enrich science today. The dialogical dimension of the history of science has long been marginalized by an excessive concern on why modern science emerged in Europe but not in any of the advanced civilizations of the East. This focus upon what has been called Joseph Needham's Grand Comparative Question ignores his other project focused on showing how dialogues between civilizations have nurtured science. Needham's Grand Dialogical Question, if we may call it that by parity, has directly or indirectly inspired a vast body of literature showing how interconnections of civilizations over the last three thousand years and exchanges of cosmological, mathematical, geographical, physical, biological, and medical technologies, techniques, practices, and knowledge have been woven together to produce current science. Bringing together scholars whose research range across multiple civilizations and disciplines, this book investigates the scope and limits of Needham's dialogical vision for science. **Hygienic Modernity**

Ruth Rogaski, 2004-11-29. Placing meanings of health and disease at the center of modern Chinese consciousness, Ruth Rogaski reveals how hygiene became a crucial element in the formulation of Chinese modernity in the nineteenth and twentieth centuries. Rogaski focuses on multiple manifestations across time of a single Chinese concept, *weisheng*, which has been rendered into English as hygiene, sanitary health, or public health as it emerged in the complex treaty port environment of Tianjin. Before the late nineteenth century, *weisheng* was associated with diverse regimens of diet, meditation, and self-medication. Hygienic Modernity reveals how meanings of *weisheng* with the arrival of violent imperialism shifted from Chinese cosmology to encompass such ideas as national sovereignty, laboratory knowledge, the cleanliness of bodies, and the fitness of races, categories in which the Chinese were often deemed lacking by foreign observers and Chinese elites alike.

A New History of Vaccines for Infectious Diseases Anthony R. Rees, 2022-01-04. A New History of Vaccines for Infectious Diseases: Immunization, Chance, and Necessity covers the developments of vaccines and how they have obliterated many fatal diseases and infections over time. The book treads a neutral path but does not avoid discussion. As uncertainty in the outcome of vaccination can only be determined by experiment, the path to vaccine development has been scientifically complex because the immune system and the manner in which humans respond to infection is variable and complex. Finally, the book describes the risks and benefits of vaccines in a visibly objective manner. 2023 PROSE Awards Winner, Finalist, History of Science, Medicine, and Technology Association of American Publishers. Gives an objective description of the science behind vaccine discovery. Presents awareness and discussions on controversies both past and present. Provides historical context to the scientific aspects of immunization, including what worked, what didn't, and why. Written by a scientist with no vested interest in vaccine development. Clears up many misunderstandings for today's vaccination policies. **Martial Arts**

Studies Paul Bowman, 2015-04-09. The phrase martial arts studies is increasingly circulating as a term to describe a new field

of interest But many academic fields including history philosophy anthropology and Area studies already engage with martial arts in their own particular way Therefore is there really such a thing as a unique field of martial arts studies Martial Arts Studies is the first book to engage directly with these questions It assesses the multiplicity and heterogeneity of possible approaches to martial arts studies exploring orientations and limitations of existing approaches It makes a case for constructing the field of martial arts studies in terms of key coordinates from post structuralism cultural studies media studies and post colonialism By using these anti disciplinary approaches to disrupt the approaches of other disciplines Martial Arts Studies proposes a field that both emerges out of and differs from its many disciplinary locations

The Chile Pepper in China Brian R. Dott, 2020-05-12 Chinese cuisine without chile peppers seems unimaginable Entranced by the fiery taste diners worldwide have fallen for Chinese cooking In China chiles are everywhere from dried peppers hanging from eaves to Mao's boast that revolution would be impossible without chiles from the eighteenth century novel Dream of the Red Chamber to contemporary music videos Indeed they are so common that many Chinese assume they are native Yet there were no chiles anywhere in China prior to the 1570s when they were introduced from the Americas Brian R Dott explores how the nonnative chile went from obscurity to ubiquity in China influencing not just cuisine but also medicine language and cultural identity He details how its versatility became essential to a variety of regional cuisines and swayed both elite and popular medical and healing practices Dott tracks the cultural meaning of the chile across a wide swath of literary texts and artworks revealing how the spread of chiles fundamentally altered the meaning of the term spicy He emphasizes the intersection between food and gender tracing the chile as a symbol for both male virility and female passion Integrating food studies the history of medicine and Chinese cultural history The Chile Pepper in China sheds new light on the piquant cultural impact of a potent plant and raises broader questions regarding notions of authenticity in cuisine

Science and Civilisation in China, Part 6, Medicine Joseph Needham, 2000-04-13 The latest volume in Joseph Needham's magisterial review of China's premodern scientific and technological traditions introduces the history of medicine Following the deaths of Joseph Needham and Lu Gwei Djen a considerable amount of written material on the development of Chinese medicine awaited publication This material has been gathered together by the editor Nathan Sivin in the five essays contained in this volume They offer a broad and readable account of medicine in culture including hygiene and preventive medicine forensic medicine and immunology and the examinations taken by some Chinese physicians for more than a thousand years Professor Sivin has edited the essays expanding them where appropriate and incorporating the results of recent research His extensive introduction discusses the contributions of Needham and Lu placing the essays in context and surveys recent scholarship from China Japan Europe and the United States

Geo-Narratives of a Filial Son Elizabeth Kindall, 2020-05-11 Huang Xiangjian a mid seventeenth century member of the Suzhou local elite journeyed on foot to southwest China and recorded its sublime scenery in site specific paintings Elizabeth Kindall's innovative analysis of the visual experiences and social functions

Huang conveyed through his oeuvre reveals an unrecognized tradition of site paintings here labeled geo narratives that recount specific journeys and create meaning in the paintings Kindall shows how Huang created these geo narratives by drawing upon the Suzhou place painting tradition as well as the encoded experiences of southwestern sites discussed in historical gazetteers and personal travel records and the geography of the sites themselves Ultimately these works were intended to create personas and fulfill specific social purposes among the educated class during the Ming Qing transition Some of Huang s paintings of the southwest together with his travel records became part of a campaign to attain the socially generated title of Filial Son whereas others served private functions This definitive study elucidates the context for Huang Xiangjian s painting and identifies geo narrative as a distinct landscape painting tradition lauded for its naturalistic immediacy experiential topography and dramatic narratives of moral persuasion class identification and biographical commemoration

Coastal Histories Yogesh Sharma,2010 The subject of maritime and oceanic history comprises a large corpus and includes related thematic engagements such as the history of overseas exploration and expansion navalmilitary history shipping port cities the role of migrations and cross cultural processes This extensive field of enquiry also focuses upon the study of littoral societies or the coastal regions in understanding the influence of the ocean upon these lands The interface between the land and the sea with its several ecological and topographical variations has played an important role in determining human activity the settlement patterns and material culture in the coastal regions which taken together constitute huge masses of territories in all continents The general pattern of existence and the rhythm of life in all these dissociated regions however had considerable commonality due to the overwhelming impact of the two dominant elements water and land in shaping the destinies of its inhabitants Coastal societies have their own particular notion of identity and ambience which differentiates them from the extensive continental zones It is in this context that coastal territories and their histories constitute an interesting theme of enquiry The present volume examines a number of themes pertaining to different coastal regions of India coastal ecology commercial crops transmission of diseases fortifications port hierarchy new port towns vessels and boats fishing communities social life of women etc It should be of interest to students and scholars of maritime history of India
