Birch Interval:

American Beginnings Frederick Hadleigh West, Constance F. West, 1996-12 During the last Ice Age a thousand mile wide land bridge connected Siberia and Alaska creating the region known as Beringia Over twelve thousand years ago a procession of large mammals and the humans who hunted them crossed this bridge to America Much of the Russian evidence for this migration has until now remained largely inaccessible to American scholars *American Beginnings* brings together for the first time in one volume the most up to date archaeological and palaeoecological evidence on Beringia from both Russia and America An invaluable resource It will no doubt remain the key reference book for Beringia for many years to come Steven Mithen *Journal of Human Evolution* Extraordinary The fifty six contributors represent the most prominent American and Russian researchers in the region Choice Publication of this well illustrated compendium is a great service to early American and especially Siberian Upper Paleolithic archaeology Nicholas Saunders *New Scientist* This is a great book perhaps the greatest contribution to the archaeology of Beringia that has yet been published This is the kind of book to which archaeology should aspire Herbert D G Maschner *Antiquity* *New York Magazine* ,1976-05-10 *New York Magazine* was born in 1968 after a run as an insert of the *New York Herald Tribune* and quickly made a place for itself as the trusted resource for readers across the country With award winning writing and photography covering everything from politics and food to theater and fashion the magazine's consistent mission has been to reflect back to its audience the energy and excitement of the city itself while celebrating New York as both a place and an idea **Bones, Boats, and Bison** E. James Dixon, 1999 This revolutionary synthesis dispels the stereotype of big game hunters following mammoths across the Bering Land Bridge while painting a vivid picture of marine mammal hunters fishers and general foragers colonizing the New World

The Great Lakes Forest Susan Flader, 1983-01-01 *From the Pleistocene to the Holocene* C. Britt Bousman, Bradley J. Vierra, 2012-10-22 The end of the Pleistocene era brought dramatic environmental changes to small bands of humans living in North America changes that affected subsistence mobility demography technology and social relations The transition they made from Paleoindian Pleistocene to Archaic Early Holocene societies represents the first major cultural shift that took place solely in the Americas This event which manifested in ways and at times much more varied than often supposed set the stage for the unique developments of behavioral complexity that distinguish later Native American prehistoric societies Using localized studies and broad regional syntheses the contributors to this volume demonstrate the diversity of adaptations to the dynamic and changing environmental and cultural landscapes that occurred between the Pleistocene and early portion of the Holocene The authors research areas range from Northern Mexico to Alaska and across the continent to the American Northeast synthesizing the copious available evidence from well known and recent excavations With its methodologically and geographically diverse approach *From the Pleistocene to the Holocene Human Organization and Cultural Transformations in Prehistoric North America* provides an overview of the present state of knowledge regarding this crucial transformative

period in Native North America It offers a large scale synthesis of human adaptation reflects the range of ideas and concepts in current archaeological theoretical approaches and acts as a springboard for future explanations and models of prehistoric change *Paleoecology of Beringia* David M. Hopkins, John V. Matthews, Charles E. Schweger, 2013-09-17 *Paleoecology of Beringia* is the product of a symposium organized by its editors sponsored by the Wenner Gren Foundation for Anthropological Research and held at the foundation s conference center in Burg Wartenstein Austria 8 17 June 1979 The focus of this volume is on the paradox central to all studies of the unglaciated Arctic during the last Ice Age that vertebrate fossils indicate that from 45 000 to 11 000 years BP an environment considerably more diverse and productive than the present one existed whereas the botanical record where it is not silent supports a far more conservative appraisal of the region s ability to sustain any but the sparsest forms of plant and animal life The volume is organized into seven parts Part 1 focuses on the paleogeography of the Beringia The studies in Part 2 explore the ancient vegetation Part 3 deals with the steppe tundra concept and its application in Beringia Part 4 examines the paleoclimate while Part 5 is devoted to the biology of surviving relatives of the Pleistocene ungulates Part 6 takes up the presence of man in ancient Beringia Part 7 assesses the paleoecology of Beringia during the last 40 000 years **65th Annual Excursion of the Sandwich Historical Society ,**

Foragers of the Terminal Pleistocene in North America Renee Beauchamp Walker, Boyce N. Driskell, 2007-01-01 These essays cast new light on Paleoindians the first settlers of North America Recent research strongly suggests that big game hunting was but one of the subsistence strategies the first humans in the New World employed and that they also relied on foraging and fishing Frozen Fauna of the Mammoth Steppe R. Dale Guthrie, 2013-11-01 Frozen mammals of the Ice Age preserved for millennia in the tundra have been a source of fascination and mystery since their first discovery over two centuries ago These mummies their ecology and their preservation are the subject of this compelling book by paleontologist Dale Guthrie The 1979 find of a frozen extinct steppe bison in an Alaskan gold mine allowed him to undertake the first scientific excavation of an Ice Age mummy in North America and to test theories about these enigmatic frozen fauna The 36 000 year old bison mummy coated with blue mineral crystals was dubbed Blue Babe Guthrie conveys the excitement of its excavation and shows how he made use of evidence from living animals other Pleistocene mummies Paleolithic art and geological data With photographs and scores of detailed drawings he takes the reader through the excavation and subsequent detective work analyzing the animal s carcass and its surroundings the circumstances of its death its appearance in life the landscape it inhabited and the processes of preservation by freezing His examination shows that Blue Babe died in early winter falling prey to lions that inhabited the Arctic during the Pleistocene era Guthrie uses information gleaned from his study of Blue Babe to provide a broad picture of bison evolutionary history and ecology including speculations on the interactions of bison and Ice Age peoples His description of the Mammoth Steppe as a cold dry grassy plain is based on an entirely new way of reading the fossil record Basic Concepts In Family Therapy Linda Berg-Cross, 2014-05-12 First

published in 1987 *Basic Concepts in Family Therapy: An Introductory Text* presents seventeen basic psychological concepts that you may use in understanding your family or if you are a member of the helping professions your clients' families. Each chapter focuses on a single concept using material from three sources: family therapy literature, basic psychological and clinical research studies, and cross-cultural research studies. By combining the findings of family therapy practitioners with the empirical findings of basic psychological researchers and cross-cultural researchers, we can deepen our understanding of the usefulness of each of these constructs as well as their limitations.
