The Market in Birds Andrea L. Smalley, 2022-04-05 A fascinating look at how a commercial market for birds in the late nineteenth century set the stage for conservation and its legislation Between the end of the Civil War and the 1920s the United States witnessed the creation rapid expansion and then disappearance of a commercial market for hunted wild animals The bulk of commercial wildlife sales in the last part of the nineteenth century were of wildfowl who were prized not only for their eggs and meat but also for their beautiful feathers Wild birds were brought to cities in those years to be sold as food for customers tables decorations for ladies hats treasured pets and specimens for collectors cabinets Though relatively short lived this market in birds was broadly influential its rise and fall coinciding with the birth of the Progressive Era conservation movement In *The Market in Birds* historian Andrea L Smalley and wildlife biologist Henry M Reeves illuminate this crucial chapter in American environmental history Touching on ecology economics law and culture the authors reveal how commercial hunting set the terms for wildlife conservation and the first federal wildlife legislation at the turn of the twentieth century Smalley and Reeves delve into the ground level interactions among market hunters game dealers consumers sportsmen conservationists and the wild birds they all wanted Ultimately they argue wildfowl commercialization represented a revolutionary shift in wildlife use turning what had been a mostly limited local and seasonal trade into an interstate industrial capitalist enterprise In the process it provoked a critical public debate over the value of wildlife in a modern consumer culture By the turn of the twentieth century the authors reveal it was clear that wild bird populations were declining precipitously all over North America The looming possibility of a future without birds sparked intense debate nationwide and eventually culminated in the 1918 Migratory Bird Treaty Act Scholars

environmentalists wildlife professionals and anyone concerned about wildlife will find this new perspective on conservation history enlightening reading

A Passion for Birds Mark V. Barrow, Jr., 2021-08-10 In the decades following the Civil War as industrialization urbanization and economic expansion increasingly reshaped the landscape many Americans began seeking adventure and aesthetic gratification through avian pursuits By the turn of the century hundreds of thousands of middle and upper class devotees were rushing to join Audubon societies purchase field guides and keep records of the species they encountered in the wild Mark Barrow vividly reconstructs this story not only through the experiences of birdwatchers collectors conservationists and taxidermists but also through those of a relatively new breed of bird enthusiast the technically oriented ornithologist In exploring how ornithologists struggled to forge a discipline and profession amidst an explosion of popular interest in natural history *A Passion for Birds* provides the first book length history of American ornithology from the death of John James Audubon to the Second World War Barrow shows how efforts to form a scientific community distinct from popular birders met with only partial success The founding of the American Ornithologists Union in 1883 and the subsequent expansion of formal educational and employment opportunities in ornithology marked important milestones in this campaign Yet by the middle of the twentieth century when ornithology had finally achieved the status of a modern profession its practitioners remained dependent on the services of birdwatchers and other amateur enthusiasts Environmental issues also loom large in Barrow's account as he traces areas of both cooperation and conflict between ornithologists and wildlife conservationists Recounting a colorful story based on the interactions among a wide variety of bird lovers this book will interest historians of science environmental historians ornithologists birdwatchers and anyone curious about the historical roots of today's birding boom

Passions for Birds Sean Nixon, 2022-05-15 Whether as sources of joy and pleasure to be fed counted and watched as objects of sport to be hunted and killed or as food to be harvested wild birds evoke strong feelings Sean Nixon traces the transformation of these human passions for wild birds from the early twentieth century through the 1970s detailing humans close encounters with wild birds in Britain and the wider North Atlantic world Drawing on a rich range of written sources *Passions for Birds* reveals how emotional subjective and material attachments to wild birds were forged through a period of pronounced social and cultural change Nixon demonstrates how for all their differences new traditions in birdwatching and conservation field sports and bird harvesting mobilized remarkably similar feelings towards birds Striking similarities also emerged in the material forms that each of these practices used to bring birds closer to people hides and traps nets and ropes and binoculars Wide ranging in scope *Passions for Birds* sheds new light on the ways in which wild birds helped shape humans throughout the twentieth century as well as how birds themselves became burdened with multiple cultural meanings and social anxieties over time

Henry Dresser and Victorian ornithology Henry A. McGhie, 2017-11-20 This book explores the life of Henry Dresser 1838-1915 one of the most productive British ornithologists of the mid-late nineteenth and early twentieth centuries and is largely based on previously unpublished archival material Dresser travelled widely and spent time in Texas during the American Civil War He built enormous collections of skins and eggs of birds from Europe North America and Asia which formed the basis of over 100 publications including some of the finest bird books of the late nineteenth century Dresser was a leading figure in scientific society and in the early bird conservation movement his correspondence and diaries reveal the inner workings motivations personal relationships and rivalries that existed among the leading ornithologists

Thomas R. Howell's Check-list of the Birds of Nicaragua as of 1993 Thomas R. Howell, 2010-10-10 Between December 1951 and April 1967 Thomas R. Howell made 13 separate research trips to Nicaragua The result was a collection of over 2 000 bird skins and at least 16 publications that form the backbone of Nicaraguan ornithology In the late 1970s Howell began working on a manuscript that was intended to be his major contribution to the ornithology of the country The first version of this Check list of the Birds of Nicaragua was not ready until 1983 and many different typewritten versions circulated among a small but growing number of Nicaraguan biologists for the next two decades Partly because of Howell's passion for detail and completeness and finally because of his failing health in the late 1990s the check list was never published before his death in December 2004 This monograph remedies what had become a significant obstacle to further studies in the country by providing in Howell's own words a comprehensive background for subsequent explorations It documents the 654 species 611 supported with specimen evidence known to have occurred in Nicaragua as of 1993 the date of the last substantial revision of the manuscript and also provides a rationale for anticipating another 44 species The publication of this significant chapter in the history of Central American bird studies is offered both as a tribute to Tom Howell's enthusiasm and contributions and as a frame of reference and springboard for current and future ornithologists inspired to study the rich and still largely unexplored avifauna of Nicaragua
