Ourselves Unborn Sara Dubow,2010-12-15 During the past several decades the fetus has been diversely represented in political debates medical textbooks and journals personal memoirs and autobiographies museum exhibits and mass media and civil and criminal law **Ourselves Unborn** argues that the meanings people attribute to the fetus are not based simply on biological fact or theological truth but are in fact strongly influenced by competing definitions of personhood and identity beliefs about knowledge and authority and assumptions about gender roles and sexuality In addition these meanings can be shaped by dramatic historical change over the course of the twentieth century medical and technological changes made fetal development more comprehensible while political and social changes made the fetus a subject of public controversy Moreover since the late nineteenth century questions about how fetal life develops and should be valued have frequently intersected with debates about the authority of science and religion and the relationship between the individual and society In examining the contested history of fetal meanings Sara Dubow brings a fresh perspective to these vital debates

The Law of Life and Death Elizabeth Price Foley,2011-04 Are you alive Most people believe this question has a clear answer that some law defines our status as living or not for all purposes In this pioneering study Elizabeth Price Foley examines the many and surprisingly ambiguous legal definitions of what counts as human life and death

Icons of Life Lynn Morgan,2009-09-09 *Icons of Life* tells the engrossing and provocative story of an early twentieth century undertaking the Carnegie Institution of Washington's project to collect thousands of embryos for scientific study Lynn M Morgan blends social analysis sleuthing and humor to trace the history of specimen collecting In the process she illuminates how a hundred year old scientific endeavor continues to be felt in today's fraught arena of maternal and fetal politics Until the embryo collecting project which she follows from the Johns Hopkins anatomy department through Baltimore founding homes and all the way to China most people had no idea what human embryos looked like But by the 1950s modern citizens saw in embryos an image of ourselves unborn and embryology had developed a biologically based story about how we came to be Morgan explains how dead specimens paradoxically became icons of life how embryos were generated as social artifacts separate from pregnant women and how a fetus thwarted Gertrude Stein's medical career By resurrecting a nearly forgotten scientific project Morgan sheds light on the roots of a modern origin story and raises the still controversial issue of how we decide what embryos mean

The Abortion Act 1967 Sally Sheldon,Gayle Davis,Jane O'Neill,Clare Parker,2022-11-17 The Abortion Act 1967 may be the most contested law in UK history sitting on a fault line between the

shifting tectonic plates of a rapidly transforming society While it has survived repeated calls for its reform with its text barely altered for over five decades women s experiences of accessing abortion services under it have evolved considerably Drawing on extensive archival research and interviews this book explores how the Abortion Act was given meaning by a diverse cast of actors including women seeking access to services doctors and service providers campaigners judges lawyers and policy makers By adopting an innovative biographical approach to the law the book shows that the Abortion Act is a living law Using this historically grounded socio legal approach this enlightening book demonstrates how the Abortion Act both shaped and was shaped by a constantly changing society

Metabiography Caitríona Ní Dhúill, 2020-03-09 This book explores the contradictions of biography It charts shifting approaches to the writing and reading of biographies from post hagiographical attitudes of the Enlightenment heroic biographies of Romanticism and irreverent modernist portraits through to contemporary experiments in politically committed and hybrid forms of life writing The book shows how biographical texts in fact destabilise the models of historical visibility cultural prominence and narrative coherence that the genre itself seems to uphold Addressing the fraught relationships between genre and gender private and public image and text life and narrative that play out in the modern biographical tradition Metabiography suggests new possibilities for reading writing and thinking about this enduringly popular genre

Of Human Born Caroline Arni, 2024-03-12 A new history of the concept of fetal life in the human sciences At a time when the becoming of a human being in a woman s body has once again become a fraught issue from abortion debates and surrogacy controversies to prenatal diagnoses and assessments of fetal risk Of Human Born presents the largely unknown history of how the human sciences came to imagine the unborn in terms of life before birth Caroline Arni shows how these sciences created the concept of fetal life by way of experimenting on animals pregnant women and newborns how they worried about the influence of the expectant mother s living conditions and how they lingered on the question of the beginnings of human subjectivity Such were the concerns of physiologists pediatricians psychologists and psychoanalysts as they advanced the novel discipline of embryology while at the same time grappling with age old questions about the coming into being of a human person Of Human Born thus draws attention to the fundamental way in which modern approaches to the unborn have been intertwined with the configuration of the human in the age of scientific empiricism Arni revises the narrative that the modern embryo is quintessentially an embryo disembedded from the pregnant woman s body On the contrary she argues that the concept of fetal life cannot be separated from its dependency on the maternal organism countering the rhetorical discourses that have fueled the recent rollback of abortion rights in the United States
