Terror Brett Bowden, Michael T. Davis, 2008 With a foreword by Geoffrey Robertson QC The issues of terror and terrorism confront us every day every time we board a flight pick up a newspaper or watch television Concerns about terrorism now dictate domestic and foreign policies around the world In a very real sense one way or another we find ourselves in the grip of terror But what is terror How is it described measured and experienced Is the current terrorist threat unprecedented The answers to many of these questions and the lessons therein are to be found in history and nowhere more so than in Europe In fact Europe has been home to some of the most terrifying and horrific events in recorded human history This collection takes a broad ranging yet detailed look at the landmark events and epochs of terror across Europe from the Gunpowder Plot of 1605 to the terrorist bombings on the London Underground in July 2005 Drawing on leading authorities from across the globe this volume explores the historical mutation of political violence and concepts of terror Terror will be of interest to scholars of history international relations and political science to policy makers and to the educated layperson Realism and International Relations Jack Donnelly, 2000-06-01 Realism and International Relations provides students with a critical yet sympathetic survey of political realism in international theory Using six paradigmatic theories Hans Morgenthau Kenneth Waltz the Prisoners Dilemma Thucydides Machiavelli and Hobbes the book examines realist accounts of human nature and state motivation international anarchy system structure and the balance of power international institutions and morality in foreign policy Donnelly argues that common realist propositions not only fail to stand up to scrutiny but are rejected by many leading realists as well He argues that rather than a general theory of international relations realism is best seen as a philosophical orientation or research program that emphasizes in an insightful yet one sided way the constraints imposed by individual and national egoism and international anarchy Containing chapter by chapter guides to further reading and discussion questions for students this book offers an accessible and lively survey of the dominant theory in International Relations
