Journal of Agricultural and Resource Economics ,2003 *Mergers and Acquisitions* Jonathan Galloway,2017-03-02 Mergers and acquisitions occur for many legitimate reasons and should be encouraged as a matter of general policy yet the resulting increase in the level of market concentration and market strength can lead to concerns that certain deals may irreparably damage the market structure and create anti competitive effects This volume explores the competition concerns arising out of mergers and acquisitions the reasons for merger control and the fundamental options that face all jurisdictions intent on implementing an effective merger control regime The volume acts as a guide through the development of merger control law policy and scholarly thought and includes commentary on each of the key stages of any effective merger control regime The articles consider the objectives of merger control and the broader political landscape within which mergers take place the procedural issues in merger control including jurisdictional matters and due process the different substantive legal standards incorporated into merger control the relevant theories of harm and the appropriate treatment of efficiencies and the use of remedies in merger control The chosen articles mainly but not exclusively focus on the US and EU and several adopt a cross disciplinary approach encompassing law political science and economics **Postimperialism and World Politics** David G. Becker,Richard L. Sklar,1999-07-30 Postimperialism is a theory of political and social change inspired by the explosive growth of transnational corporate enterprise during the latter 20th century Its foundations are derived from two primary sources political theories of the modern business corporation and class analytical theories of society However the postimperialist theory of class formation is predicated on power relations a departure from conventional class analysis that renders the theory applicable universally to countries at different stages of economic development Postimperialist thinkers contend that the formation of a global bourgeoisie resulting from transnational class coalescence coincides with the evolution of institutions and public policies that are compatible with socialist as well as capitalist principles This book provides theoretical contributions to postimperialist theory as well as case studies of both individual countries Britain Cuba

the United States and regions of the world Africa postcommunist Europe It also contains historical analyses of the origins of postimperialist thought in Mexico and the United States Topics considered include the transfer of cultural and ideological values multilateral legal responses to transnational oligopolies the problems of predatory corporate behavior and perceived neoimperial threats working class responses to the challenges of transnational enterprise the effects of resistance to market based economic reforms opposition to imperial spheres of influence and postimperialism s contributions to theories of international politics
