Minority Report John D. Griffin,Brian Newman,2008-09-15 Are the views of Latinos and African Americans underrepresented in our federal government For that matter what does it mean to be represented equitably Rather than taking for granted a single answer to these complex questions John Griffin and Brian Newman use different measures of political equality to reveal which groups get what they want from government and what factors lead to their successes One of the first books to compare the representation of both African Americans and Latinos to that of whites Minority Report shows that congressional decisions and federal policy tend to mirror the preferences of whites as a group and as individuals better than the preferences of either minority group even after accounting for income disparities This is far from the whole story though and the authors multifaceted approach illustrates the surprising degree to which group population size an issue s level of importance the race or ethnicity of an office holder and electoral turnout can affect how well government action reflects the views of each person or group Sure to be controversial Minority Report ultimately goes beyond statistical analyses to address the root question of what equal representation really means

Winners and Losers of EU Integration Helena Tang,2000-01-01 The contributors include researchers from the ten CEECs as well as from current EU member countries **BOOK JACKET** War and Punishment Hein Goemans,2012-01-06 What makes wars drag on and why do they end when they do Here H E Goemans brings theoretical rigor and empirical depth to a long standing question of securities studies He explores how various government leaders assess the cost of war in terms of domestic politics and their own postwar fates Goemans first develops the argument that two sides will wage war until both gain sufficient knowledge of the other s strengths and weaknesses so as to agree on the probable outcome of continued war Yet

the incentives that motivate leaders to then terminate war Goemans maintains can vary greatly depending on the type of government they represent The author looks at democracies dictatorships and mixed regimes and compares the willingness among leaders to back out of wars or risk the costs of continued warfare Democracies according to Goemans will prefer to withdraw quickly from a war they are not winning in order to appease the populace Autocracies will do likewise so as not to be overthrown by their internal enemies Mixed regimes which are made up of several competing groups and which exclude a substantial proportion of the people from access to power will likely see little risk in continuing a losing war in the hope of turning the tide Goemans explores the conditions and the reasoning behind this gamble for resurrection as well as other strategies using rational choice theory statistical analysis and detailed case studies of Germany Britain France and Russia during World War I In so doing he offers a new perspective of the Great War that integrates domestic politics international politics and battlefield developments
