Battle of Britain films had tended to focus upon the story of individuals not the bigger picture That changed with the release of the star studded epic Battle of Britain in 1969 Using real aircraft the film produced in color and on a far larger scale than had been seen on film before was notable for its spectacular flying sequences Between the release of Reach for the Sky and Battle of Britain however much had changed for modern Britain For a variety of reasons many felt that the story of the nation's pivotal moment in the Second World War was something best buried and forgotten Indeed the overall box office reaction to Battle of Britain reinforced this view all of which might explain why it was the last big screen treatment of this topic for many years It was during the Battle of Britain's seventieth anniversary year that the subject returned to the nation's screens when Matthew Wightman's docudrama First Light was first broadcast Essentially a serialisation of Spitfire pilot Geoffrey Wellum's best selling memoir of the same title Wightman cleverly combined clips of Wellum as an old man talking about the past with his new drama footage The series is in the opinion of the author the best portrayal of an individual's Battle of Britain experience to have been made In this fascinating exploration of the Battle of Britain on the big screen renowned historian and author Dilip Sarkar examines the popular memory and myths of each of these productions and delves into the arguments between historians and the filmmakers Just how true to the events of the summer of 1940 are they and how much have they added to the historical record of The Finest Hour

Surveillance on Screen

Sébastien Lefait,2013 The theme of surveillance has become an increasingly common element in movies and television shows perhaps as a response to the sense that the world is now virtually under watch But the recent surge of this filmic device calls for an explanation that transcends the basic assumption that media illustrates the changes of society The persistent and growing presence of surveillance in cinematic productions is not merely a reflection of the advent of surveillance societies but rather an aesthetic adaptation to the evolution of watching patterns In *Surveillance on Screen* Monitoring Contemporary Films and Television Programs Sébastien Lefait examines this ever increasing phenomenon Drawing on the rapidly developing field of surveillance studies Lefait offers an in depth analysis of television shows and films which complement current theoretical approaches to those subjects This unique combination of surveillance theories with the latest concepts of film television and Internet studies is based on a large and diversified range of popular series and films including the shows 24 Lost and Survivor as well as such films as Minority Report Paranormal Activity The Truman Show and the on screen version of George Orwell s Nineteen Eighty Four Written from a perspective that does not limit itself to a reflection of society approach this book explores both how cinema shapes our experience of surveillance and how surveillance influences our viewing of cinema Lefait follows the various identifiable stages in cinema s experimental use of surveillance studying the impact of technology on both the watcher and the watched In addition to film and media studies this book will be of interest to those engaged in information technology sociology and of course surveillance studies
