The Social Sources of Financial Power Leonard Seabrooke, 2018-07-05 A state s financial power is built on the effect its credit property and tax policies have on ordinary people this is the key message of Leonard Seabrooke s comparative historical investigation which turns the spotlight away from elite financial actors and toward institutions that matter for the majority of citizens Seabrooke suggests that everyday contests between social groups and the state over how the economy should work determine the legitimacy of a state s financial and fiscal system Ideally he believes such contests compel a state to intervene on behalf of people below the median income level leading the state to broaden and deepen its domestic pool of capital while increasing its influence on international finance But to do so Seabrooke asserts a state must first challenge powerful interests that benefit from the concentration of financial wealth Seabrooke s novel constructivist approach is informed by economic sociology and the work of Max Weber This book demonstrates how domestic legitimacy influences the character of international financial orders It

will interest all readers concerned with how best to transform state intervention in the economy for the good of the majority

Power Seekers Peter Nagle, 2018-11-15 In 1970 Nagle while living in Papua New Guinea decides to write a fictional book about fictional people in politics and not about politics itself He penned the title in 1972 as *Power Seekers* which remains the title today The book is a trilogy Book 1 is *The Way to Power* book 2 is *In Power* and book 3 is *Out of Power* *Power Seekers* book 1 *The Way to Power* begins the life times and adventures of one man Richard Harris a man with a common name but an uncommon nature This book is purely fictional as to persons institutions times and places It is about a man not a person who is ruthlessly ambitious a Catholic believer but not too religious and a true follower of Jung's synchronicity philosophy *Power Seekers* takes the reader into a world of ruthless people envy jealousy ambition treachery hatred love disloyalty and lust It takes the reader into the wealth and power of the big end of town and their extensive influence on all political parties and to the inner thoughts of the real leader of Australia the boss of all bosses Therein lay the reader's journey into the light Yet Nagle does define a caring world of some parliamentarians as opposed to the opportunistic world of some other so called politicians There will be some who read Nagle's book and may think this book is based upon them fully or in part or about their lives or the lives of real people as a character but as Nagle says in the preface this view is wrong and if they still hold this view to be true they are advised of Carley Simon's song you're so vain if you think this book is about you

Integrity, Risk and Accountability in Capital Markets Justin O'Brien, George Gilligan, 2014-07-18 The global economy is yet to recover from the aftershocks of the Global Financial Crisis GFC In particular many national economies are struggling to adjust to austerity programs that are a direct result of the toxic effects of the crisis Governments regulatory agencies international organisations media commentators finance industry organisations and professionals academics and affected citizens have offered partial explanations for what has occurred Some of these actors have sought to introduce legislative and other

regulatory initiatives to improve operational standards in capital markets However the exposure post GFC of the scandal surrounding the manipulation over many years of the London Interbank Offered Rate LIBOR highlighted that the most important obstacles to counter the destructive potential of our global finance system are normative not technical Regulating the culture of the finance sector is one of the greatest challenges facing contemporary society This edited volume brings together leading professionals regulators and academics with knowledge of how cultural forces shape integrity risk and accountability in capital markets The book will be of benefit not only to industry regulatory and academic communities whose focus is upon financial markets and professionals It is of value to any person or organisation interested in how the cultural underpinnings of the finance sector shape how capital markets actually operate and are regulated It is a stark lesson of history that financial crises will occur As national economies become ever more inter connected and inter dependent under conditions of global financial capitalism it becomes ever more important to know how cultural and other normative forces might be adjusted to militate against the effects of future disasters

Markets in Vice, Markets in Virtue John Braithwaite, 2005 John Braithwaite argues that there are markets in vice as well as markets in virtue with the same characteristic supply and demand and demonstrates the mechanisms whereby competition induces demand for vice and more importantly the regulatory inventions that can be used to flip markets in vice to markets in virtue

Men at Work Annabel Crabb, 2019-09-09 When New Zealand's prime minister Jacinda Ardern announced her pregnancy the headlines raced around the world But when Scott Morrison and Josh Frydenberg became the first prime minister and treasurer duo since the 1970s to take on the roles while bringing up young children this detail passed largely without notice Why do we still accept that fathers will be absent Why do so few men take parental leave in this country Why is flexible and part-time work still largely a female preserve In the past half-century women have revolutionised the way they work and live But men's lives have changed remarkably little Why Is it because men don't want to change Or is it because every day in various ways they are told they shouldn't In *Men at Work* Annabel Crabb deploys political observation workplace research and her characteristic humour and intelligence to argue that gender equity cannot be achieved until men are as free to leave the workplace when their lives demand it as women are to enter it Women's

surge into the workplace has been profound over the last century But it hasn't been matched by movement in the other direction while the entrances have been opened to women the exits are still significantly blocked to men And if women have benefited from the sentiment that girls can do anything then don't we similarly owe it to the fathers mothers and children of the future to ensure that boys can do anything means everything from home to work Annabel Crabb Men at Work
