Venkataraman, 2002-03 *Big Science and Research Infrastructures in Europe* Katharina C. Cramer, Olof Hallonsten, 2020-08-28 This thought provoking book expands on the notion that Big Science is not the only term to describe and investigate particularly large research projects scientific collaborations and facilities It investigates the significant overlap between Big Science and Research Infrastructures RIs in a European context since the early twenty first century Contributions to this innovative book not only augment the study of Big Science with new perspectives but also launch the study of RIs as a promising new line of inquiry **Danger in the Car Park** Annette Smith, 2001 Zac prevents a bad accident while grocery shopping with his mother *Burn Math Class* Jason Wilkes, 2016-03-22 A manifesto for a mathematical revolution Forget everything you ve been taught about math In Burn Math Class Jason Wilkes takes the traditional approach to how we learn math with its unwelcoming textbooks unexplained rules and authoritarian assertions and sets it on fire Focusing on how mathematics is created rather than on mathematical facts Wilkes teaches the subject in a way that requires no memorization and no prior knowledge beyond addition and multiplication From these simple foundations Burn Math Class shows how mathematics can be re invented from scratch without preexisting textbooks and courses We can discover math on our own through experimentation and failure without appealing to any outside authority When math is created free from arcane notations and pretentious jargon that hide the simplicity of mathematical concepts it can be understood organically and it becomes fun Following this unconventional approach Burn Math Class leads the reader from the basics of elementary arithmetic to various advanced topics such as time dilation in special relativity Taylor series and calculus in infinite dimensional spaces Along the way Wilkes argues that orthodox mathematics education has been teaching the subject backward calculus belongs before many of its so called prerequisites and those prerequisites cannot be fully understood without calculus Like the smartest craziest teacher you ve ever had Wilkes guides you on an adventure in mathematical creation that will radically change the way you think about math Revealing the beauty and simplicity of this timeless subject Burn Math Class turns everything that seems difficult about

mathematics upside down and sideways until you understand just how easy math can be **Softwar** Matthew Symonds, 2013-04-30 In a business where great risks huge fortunes and even bigger egos are common Larry Ellison stands out as one of the most outspoken driven and daring leaders of the software industry The company he cofounded and runs Oracle is the number one business software company perhaps even more than Microsoft s Oracle s products are essential to today s networked world But Oracle is as controversial as it is influential as feared as it is revered thanks in large part to Larry Ellison Though Oracle is one of the world s most valuable and profitable companies Ellison is not afraid to suddenly change course and reinvent Oracle in the pursuit of new and ever more ambitious goals Softwar examines the results of these shifts in strategy and the forces that drive Ellison relentlessly on In Softwar journalist Matthew Symonds gives readers an exclusive and intimate insight into both Oracle and the man who made it and runs it As well as relating the story of Oracle s often bumpy path to industry dominance Symonds deals with the private side of Ellison s life From Ellison s troubled upbringing by adoptive parents and his lifelong search for emotional security to the challenges and opportunities that have come with unimaginable wealth Softwar gets inside the skin of a fascinating and complicated human being With unlimited insider access granted by Ellison himself Symonds captures the intensity and some would say the recklessness that have made Ellison a legend The result of more than a hundred hours of interviews and many months spent with Ellison Softwar is the most complete portrait undertaken of the man and his empire a unique and gripping account of both the way the computing industry really works and an extraordinary life Despite his closeness to Ellison Matthew Symonds is a candid and at times highly critical observer And in perhaps the book s most unusual feature Ellison responds to Symonds s portrayal in the form of a running footnoted commentary The result is one of the most fascinating business stories of all time **Wind Energy Comes of Age** Paul Gipe, 1995-04-14 He cites improvements in the performance reliability and cost effectiveness of modern wind turbines to support his contention that wind energy has come of age as a commercial technology
