Boot Straps The Autobiography Of Tom M G:

An Economic History of the American Steel Industry Robert P. Rogers,2009-03-30 This book provides a basic outline of the history of the American steel industry a sector of the economy that has been an important part of the industrial system The book starts with the 1830 s when the American iron and steel industry resembled the traditional iron producing sector that had existed in the old world for centuries and it ends in 2001 The product of this industry steel is an alloy of iron and carbon that has become the most used metal in the world The very size of the steel industry and its position in the modern economy give it an unusual relevance to the economic social and political system Classed Subject Catalog Engineering Societies Library,1963 *Antiquarian Bookman* ,1957 *Publication* ,1991 *Pharmacokinetic-Pharmacodynamic Modeling and Simulation* Peter L. Bonate,2006-05-14 A natural hierarchy exists in pharmacokinetic pharmacodynamic modeling culminating in population pharmacokinetic models which are a specific type of nonlinear mixed effects model The purpose of this book is to present through theory and example how to develop pharmacokinetic models both at an individual and population level In order to do so however one must first understand linear models and then build to nonlinear models followed by linear mixed effects models and then ultimately nonlinear mixed effects models This book develops in that manner each chapter builds upon previous chapters by first presenting the theory and then illustrating the theory using published data sets and actual data sets that were used in the development of new chemical entities collected by the author during his years in industry A key feature of the book is the process of modeling Most books and manuscripts often present the final model never showing how the model evolved In this book all examples are presented in an evolutionary manner

Statistical Models and Methods for Lifetime Data Jerald F. Lawless,2011-01-25 Praise for the First Edition An indispensable addition to any serious collection on lifetime data analysis and a valuable contribution to the statistical literature Highly recommended Choice This is an important book which will appeal to statisticians working on survival analysis problems Biometrics A thorough unified treatment of statistical models and methods used in the analysis of lifetime data this is a highly competent and agreeable statistical textbook Statistics in Medicine The statistical analysis of lifetime or response time data is a key tool in engineering medicine and many other scientific and technological areas This book provides a unified treatment of the models and statistical methods used to analyze lifetime data Equally useful as a reference for individuals interested in the analysis of lifetime data and as a text for advanced students Statistical Models and Methods for Lifetime Data Second Edition provides broad coverage of the area without concentrating on any single field of application Extensive illustrations and examples drawn from engineering and the biomedical sciences provide readers with a clear understanding of key concepts New and expanded coverage in this edition includes Observation schemes for lifetime data Multiple failure modes Counting process martingale tools Both special lifetime data and general optimization software Mixture models Treatment of interval censored and truncated data Multivariate lifetimes and event history models

Resampling and simulation methodology Boot and Shoe Recorder ,1907 *Hitler's Blitzkrieg Enemies 1940* Nigel Thomas,2014-02-20 The armies of Denmark Norway the Netherlands and Belgium bore the first crushing impact of Hitler's mighty Blitzkrieg war machine in Western Europe in a campaign that astonished and terrified the world The German Wehrmacht was millions strong equipped with the latest guns tanks and aircraft and had the priceless advantage of having learned the realities of modern warfare in Poland the previous September The defenders of Scandinavia and the Low Countries were raised from small populations and were inadequately funded trained equipped and armed Their modest numbers inexperience and largely indefensible borders condemned them to rapid defeat For this reason they have tended to be neglected by history in many cases unjustly Featuring period photographs and full colour artwork this book examines the dress insignia equipment organization and combat performance of the Danish Norwegian Dutch and Belgium armies thousands of soldiers who fought heroically in hopeless defence against the Nazi juggernaut *Molecular Genetic Approaches in Conservation* Thomas B. Smith,Robert K. Wayne,1996-10-24 Molecular techniques are proving invaluable in determining the phylogenetic status of potentially endangered species for investigating mechanisms of speciation and for measuring the genetic structure of populations It is increasingly important for ecologists and evolutionary and conservation biologists to understand and use such molecular techniques but most workers in these areas have not been trained in molecular biology This book lays out the principles and basic techniques for the molecular tools appropriate for addressing issues in conservation and it presents case studies showing how these tools have been used successfully in conservation biology Examples include the genetic analysis of population structure various uses of DNA in conservation genetics and estimation of migration parameters from genetic data Wildlife managers as well as researchers in these areas will find this a valuable book Lifetime Data: Models in Reliability and Survival Analysis Nicholas P. Jewell,Alan C. Kimber,Mei-Ling Ting Lee,G. Alex Whitmore,2013-04-17 Statistical models and methods for lifetime and other time to event data are widely used in many fields including medicine the environmental sciences actuarial science engineering economics management and the social sciences For example closely related statistical methods have been applied to the study of the incubation period of diseases such as AIDS the remission time of cancers life tables the time to failure of engineering systems employment duration and the length of marriages This volume contains a selection of papers based on the 1994 International Research Conference on Lifetime Data Models in Reliability and Survival Analysis held at Harvard University The conference brought together a varied group of researchers and practitioners to advance and promote statistical science in the many fields that deal with lifetime and other time to event data The volume illustrates the depth and diversity of the field A few of the authors have published their conference presentations in the new journal Lifetime Data Analysis Kluwer Academic Publishers
