A New Start For The Child With Reading Problems:

A New Start for the Child with Reading Problems Carl H. Delacato, 1970 Encyclopedia of Special Education Cecil R. Reynolds, Elaine Fletcher-Janzen, 2007-01-02 Offers a thoroughly revised comprehensive A to Z compilation of authoritative information on the education of those with special needs **The Neurologically-Impaired Child** Robert A.

Cummins, 2018-10-03 For the 25 years before publication a form of therapy known as the Doman Delacato Techniques had been applied to children with disabilities The therapy originated from the work of Glen Doman and Carl Delacato who established the Institutes for the Achievement of Human Potential in Philadelphia The institutes claim to be able to treat a wide range of disabilities and their best known technique is called Patterning and is prescribed for children who have no capacity for voluntary movement Yet many professional bodies and associations have denounced the approach as overly expensive ineffective creating false hopes being destructive to family life and based on false theoretical assumptions Originally published in 1988 this book was the first to offer a detailed analysis and critique of the Doman Delacato approach The author draws on data from evolution neuroanatomy and neurophysiology to challenge its theoretical assumptions He shows that there is no sound scientific basis to the techniques Any improvements in a child's condition can be attributed to the increased energy and attention given to that child rather than the content of the programme At the same time parents become emotionally ransomed and deluded by false expectations Written in a style that will be accessible to non specialists the book is an important work for both parents and professionals concerned with the welfare of neurologically impaired children **The Undivided Self** Theodore Dimon, 1999 Outlining the basic principles of the Alexander Technique the objective of which is to gain conscious control over one's actions The Undivided Self challenges the concept that mind and body are interacting systems Once we become aware of damaging patterns we can learn to break these habits and establish a new beneficial approach to health that will help control and prevent anxiety pain and distress **Attention, Balance and Coordination** Sally Goddard Blythe, 2017-03-16 An updated edition of the definitive handbook on the physical basis for learning for professionals involved in education and child development written by the respected author of acclaimed titles in the field A comprehensive overview of the relationship between neuromotor maturity and physical development on learning outcomes and behaviour in childhood and later life Explores why early reflexes are important their functions in early development their effects on learning and behavior if retained and the possible effects on other aspects of development Brings together a specialist body of knowledge and makes it accessible to anyone involved in treating the symptoms of specific learning difficulties and emotional problems Includes new information on the role of the vestibular system in anxiety and agoraphobia a new chapter of case studies and an Epilogue placing the INPP Method in a broader scientific context

Instrumental Music for Dyslexics Sheila Oglethorpe, 2008-04-15 Instrumental Music for Dyslexics is written mainly for music teachers It describes dyslexia in layman's terms and explains how the various problems which a dyslexic may have can

affect all aspects of learning to play a musical instrument It alerts the music teacher with a problem pupil to the possibilities of that pupil s having some form of dyslexia Although Sheila Oglethorpe is primarily a piano teacher the general principle behind most if not all the suggestions is such that they can be adapted for use by other instrumentalists The book presents ways in which the music teacher can contribute to the self esteem and thereby the general welfare of the dyslexic pupil who is often musically gifted and has much to offer The book will also be of interest to dyslexia specialists who have hitherto directed their concentration towards the language based problems of the dyslexic
