The Death of Character James Davison Hunter, 2008-01-04 The Death of Character is a broad historical sociological and cultural inquiry into the moral life and moral education of young Americans based upon a huge empirical study of the children themselves The children s thoughts and concerns expressed here in their own words shed a whole new light on what we can expect from moral education Targeting new theories of education and the prominence of psychology over moral instruction Hunter analyzes the making of a new cultural narcissism

Character Education Wouter Sanderse, 2012 Many teachers want to contribute to children s moral development but this desire has not always resulted in a profound grasp of what moral education really means why it would be desirable and how it can best be achieved This book confronts these questions by examining what Aristotelian virtue ethics can illuminate about moral education At the same time it evaluates whether Aristotelian theory can still be useful for contemporary educational practice The argument culminates in a morally justified and psychologically realistic account of how virtue can best be taught in schools The approach called character education sees moral education not as enforcing rules or transferring values in separate subjects Instead it encourages teachers to be a morally exemplary teacher which is revealed through all kinds of small decisions and emotional reactions This philosophical essay takes a constructive but critical stance towards empirical research about the effectiveness of teaching methods and the realism of character traits
