A Research Odyssey Developing And Testing A Community Theory:

A Research Odyssey George A. Hillery, Making Charisma Anthony J. Blasi, The authority of charisma entails a devotion to the exceptional sanctity heroism or exemplary character of an individual person In the sociology of religion it has long been held that the authority of institutions is legitimated by their identification with charismatic personalities However in this book which examines the construction of St Paul s public image Anthony J Blasi argues that charisma comes as much from us as it is projected by the personages It is a work of the collective imagination and a fulfillment of a social need Thus the charisma of St Paul is shown to emerge as much or more from the dynamics of early Christianity s institutionalization as from the person of Paul While acknowledging the importance of certain features of Paul s actual biography the principle focus of the book is on how Paul became an important personality in Christian tradition in the decades immediately following his death The ability of the charismatic personality to make acts and creeds religiously legitimate is usually thought of by sociologists as producing normative organizations such as churches but here it is shown that Paul s charisma was consciously fostered and promoted by the incipient Christian church The book is divided into segments that examine the social construction of charisma the role of St Luke in fashioning Paul s posthumous image the traditions and legends that grew up around Paul after his death including inauthentic Pauline letters written in his name and the dynamics of constructing the image in the religious and historical context of the time The author concludes with a reconsideration of what is meant by charisma and how it is created This is one of the few studies which takes advantage of the methods of literary criticism to explore the social processes at work in early Christianity *Making Charisma* will be of interest to sociologists of religion and a wide range of scholars interested in the history of religion International Handbook of Computer-Supported Collaborative Learning Ulrike Cress, Carolyn Rosé, Alyssa Friend Wise, Jun Oshima, 2021-10-08 CSCL has in the past 15 years and often in conjunction with Springer grown into a thriving and active community Yet lacking is a comprehensive CSCL handbook that displays the range of research being done in this area This handbook will provide an overview of the diverse aspects of the field allowing newcomers to develop a sense of the entirety of CSCL research and for existing community members to become more deeply aware of work outside their direct area The handbook will also serve as a ready reference for foundational concepts methods and approaches in the field The chapters are written in such a way that each of them can be used in a stand alone fashion while also serving as introductory readings in relevant study courses or in teacher education While some CSCL relevant topics are addressed in the *International Handbook of the Learning Sciences* and the *International Handbook of Collaborative Learning* these books do not aim to present an integrated and comprehensive view of CSCL The *International Handbook of Computer Supported Collaborative Learning* covers all relevant topics in CSCL particularly recent developments in the field such as the rise of computational approaches and learning analytics

aspirations for the good life confront the dilemmas and detours of real life Suzanne Keller combines penetrating analysis of classic ideas about community with a remarkable and unprecedented thirty year case study of one of the first planned unit developments in America and the first in New Jersey Twin Rivers this pioneering venture featured townhouses and shared spaces for children s play and adult work and play in a society that stresses individual over collective goals and private over public concerns Hence the timeless questions asked over millennia How does an aggregate of strangers create an identity of place shared goals viable institutions and a spirit of mutuality and reciprocity What obstacles stand in the way and how are these overcome And how does design generate or deter community spirit Inspired by the legacy of Plato Rousseau de Tocqueville and T nnies Keller traces the difficult birth and the rich unfolding of Twin Rivers from a former potato field into a vibrant contemporary community Most community studies remain at a highly descriptive level This book has both broader and deeper aims endeavoring to develop principles of the common life as we enter the age of cyberspace Keller reveals the community of Twin Rivers through a multidimensional social microscope having monitored the community from the day it opened by participant observation attitude surveys the study of collective records and nearly 1 000 in depth interviews with homeowners She offers fascinating insight into how residents maintain privacy relate to neighbors cope with social conflict and develop ideas about the common good She shows that Twin Rivers residents remain hopeful about the possibility of community despite variable success in achieving their desires Indeed she argues that the hard won experience more than the utopian ideal is the true measure of community Keller concludes that despite the homogenizing effects of mass communication and globalization local communities will continue to proliferate in the foreseeable future due to changing lifestyles and the continuing quest for roots This important and engaging book will be appreciated by social scientists architects physical planners developers and lenders and community leaders as well as by the general reader interested in creating a bridge between individualism and community
