**A Shared World** Molly Greene,2002-03-11 Here Molly Greene moves beyond the hostile Christian versus Muslim divide that has colored many historical interpretations of the early modern Mediterranean and reveals a society with a far richer set of cultural and social dynamics She focuses on Crete which the Ottoman Empire wrested from Venetian control in 1669 Historians of Europe have traditionally viewed the victory as a watershed the final step in the Muslim conquest of the eastern Mediterranean and the obliteration of Crete s thriving Latin based culture But to what extent did the conquest actually change life on Crete Greene brings a new perspective to bear on this episode and on the eastern Mediterranean in general She argues that no sharp divide separated the Venetian and Ottoman eras because the Cretans were already part of a world where Latin Christians Muslims and Eastern Orthodox Christians had been intermingling for several centuries particularly in the area of commerce Greene also notes that the Ottoman conquest of Crete represented not only the extension of Muslim rule to an island that once belonged to a Christian power but also the strengthening of Eastern Orthodoxy at the expense of Latin Christianity and ultimately the Orthodox reconquest of the eastern Mediterranean Greene concludes that despite their religious differences both the Venetian Republic and the Ottoman Empire represented the ancien r gime in the Mediterranean which accounts for numerous similarities between Venetian and Ottoman Crete The true push for change in the region would come later from Northern Europe

**Recognising and Responding to Animal Emotion in a Shared World** Vicki Hutton,2023-11-16 How is it that depending on the setting the same cat can be perceived as a homeless annoyance a potential research subject or a thinking and feeling family member The answer is bound up in our perception of non human animals capacity to experience emotions and this book draws on contemporary evidence based research observations interviews and anecdotal case scenarios to explore the growing knowledge base around animal emotion Acknowledging that animals can experience feelings directly affects the way that they are perceived and treated in many settings and the author explores the implications when humans apply or ignore this knowledge selectively between species and within species This information is presented within the unique context of a proposed hierarchy of perceived non human animals emotional abilities often based on human interpretation of the animal s emotional capacity with examples of how this manifests at an emotional spiritual and moral level Implications for specific groups living with caring for or working with non human animals are examined making the book of particular interest to those working studying or researching in the veterinary professions animal ethics law and welfare and zoology biology and animal science This book will also be fascinating reading for anyone interested in simply learning more about the animals with whom we share this planet For some readers it will validate the reciprocal emotional bond they feel for living creatures For others it will raise questions about the moral treatment of sentient non human beings breaking down the human protective barrier of cognitive dissonance and activating a cycle of change

Overcoming Social Polarization Jessica L. Neu, 2024-12-15 In this book Jessica Neu explores how to advance the discussion of deliberative democracy in an era defined by widespread social polarization and identity politics By utilizing the communication ethics scholarship of Ronald C Arnett as a theoretical framework and reference point for analysis Neu analyzes several pop culture artifacts to demonstrate how communication ethics and narrative driven perspectives can be applied pragmatically in order to reach dialogic civility in a post truth era Through recognizing each artifact s relationship with rhetoric Neu highlights how they each represent ways in which discursive environment in physical space can be utilized to promote depolarization Ultimately this book provides a paradigmatic model that demonstrates how any individual can utilize this framework of communication ethics and deliberative democracy to enter a space of dialogic civility to depolarize our current post truth world

Morrill, 2019-11-18 Throughout the second half of the twentieth century sacramental theology has evolved as a discipline advancing comprehensive theories of sacraments and sacramentality as integral to the Christian faith while also studying the history and theology of the particular rites Now in the twenty first century the need for attention to the actual performance and specific social settings of sacramental worship has become well established This makes the work of sacramental theology necessarily engaged with multiple cross disciplinary theories attentive to particular contexts whether local national or global Still the divine human encounter at the heart of Christian symbol and ritual likewise beckons to philosophical theological reflection The essays in this volume begin with profound philosophical perspectives on the personal and communal sacramental experience expanding from traditional cosmology to evolutionary and chaos theories of our planetary existence continuing with shifts especially among youth to interreligious and non institutional perspectives consideration of change in popular notions of guilt and social ethical issues in relation to liturgical theology and practice so as finally to return to fundamental theological reflection on human sacramentality and divine revelation
