Abstraction, Reformulation and Approximation Jean-Daniel Zucker, Lorenza Saitta, 2005-07-14 This book constitutes the refereed proceedings of the 6th International Symposium on Abstraction Reformulation and Approximation SARA 2005 held in Airth Castle Scotland UK in July 2005 The 17 revised full papers and 8 extended abstracts were carefully reviewed and selected for inclusion in the book Also included are 3 invited papers and 8 research summaries All current aspects of abstraction reformulation and approximation in the context of human common sense reasoning problem solving and efficiently reasoning in complex domains are addressed Among the application fields of these techniques are automatic programming constraint satisfaction design diagnosis machine learning search planning reasoning game playing scheduling and theorem proving

Abstraction, Reformulation, and Approximation Berthe Y. Choueiry, Toby Walsh, 2003-06-26 This volume contains the proceedings of SARA 2000 the fourth Symposium on Abstraction Reformulations and Approximation SARA The conference was held at Horseshoe Bay Resort and Conference Club Lake LBJ Texas July 26 29 2000 just prior to the AAAI 2000 conference in Austin Previous SARA conferences took place at Jackson Hole in Wyoming 1994 Ville d Est erel in Quebec 1995 and Asilomar in California 1998 The symposium grew out of a series of workshops on abstraction approximation and reformulation that had taken place alongside AAAI since 1989 This year s symposium was actually scheduled to take place at Lago Vista Clubs Resort on Lake Travis but due to the resort s failure to pay taxes the conference had to be moved late in the day This mischance engendered eleventh hour reformulations abstractions and resource re allocations of its own Such are the perils of organizing a conference This is the first SARA for which the proceedings have been published in the LNAI series of Springer Verlag We hope that this is a reflection of the increased maturity of the field and that the increased visibility brought by the publication of this volume will help the discipline grow even further Abstractions reformulations and approximations AR A have found applications in a variety of disciplines and problems including automatic programming constraint satisfaction design diagnosis machine learning planning qualitative reasoning scheduling resource allocation and theorem proving The papers in this volume capture a cross section of these application domains

Intelligence and Complex Systems Lorenza Saitta, Jean-Daniel Zucker, 2013-06-05 Abstraction is a fundamental mechanism underlying both human and artificial perception representation of knowledge reasoning and learning This mechanism plays a crucial role in many disciplines notably Computer Programming Natural and Artificial Vision Complex Systems Artificial Intelligence and Machine Learning Art and Cognitive Sciences This book first provides the reader with an overview of the notions of abstraction proposed in various disciplines by comparing both commonalities and differences After discussing the characterizing properties of abstraction a formal model the KRA model is presented to capture them This model makes the notion of abstraction easily applicable by means of the introduction of a set of abstraction operators and abstraction patterns reusable across different domains and applications It is the impact of abstraction in Artificial Intelligence Complex Systems and Machine Learning which creates the core of the book A general framework based on the KRA model is presented and its pragmatic power is illustrated with three case studies Model based diagnosis Cartographic Generalization and learning Hierarchical Hidden Markov Models
