Academic Discourse:

Academic Discourse Ken Hyland, 2009-01-01 Academic discourse is a rapidly growing area of study attracting researchers and students from a diverse range of fields This is partly due to the growing awareness that knowledge is socially constructed through language and partly because of the emerging dominance of English as the language of scholarship worldwide Large numbers of students and researchers must now gain fluency in the conventions of English language academic discourses to understand their disciplines establish their careers and to successfully navigate their learning This accessible and readable book shows the nature and importance of academic discourses in the modern world offering a clear description of the conventions of spoken and written academic discourse and the ways these construct both knowledge and disciplinary communities This unique genre based introduction to academic discourse will be essential reading for undergraduate and postgraduate students studying TESOL applied linguistics and English for Academic Purposes

Academic Discourse Across Disciplines Ken Hyland, Marina Bondi, 2006 This volume reflects the emerging interest in cross disciplinary variation in both spoken and written academic English exploring the conventions and modes of persuasion characteristic of different disciplines and which help define academic inquiry This collection brings together chapters by applied linguists and EAP practitioners from seven different countries The authors draw on various specialised spoken and written corpora to illustrate the notion of variation and to explore the concept of discipline and the different methodologies they use to investigate these corpora The book also seeks to make explicit the valuable links that can be made between research into academic speech and writing as text as process and as social practice Academic Discourse Gabriella Del Lungo Camiciotti, Elena Tognini-Bonelli, 2004 Papers presented at a conference held June 14 16 2003 in Pontignano Siena

Academic Discourse Pierre Bourdieu, Jean-Claude Passeron, Monique de Saint Martin, 1996-03-01 In this innovative work on culture and education Pierre Bourdieu and his associates examine the role of language and linguistic misunderstanding in the teaching contexts of higher education Academic Discourse John Flowerdew, 2014-06-11 Academic Discourse presents a collection of specially commissioned articles on the theme of academic discourse Divided into sections covering the main approaches each begins with a state of the art overview of the approach and continues with exemplificatory empirical studies Genre analysis corpus linguistics contrastive rhetoric and ethnography are comprehensively covered through the analysis of various academic genres research articles PhD these textbooks argumentative essays and business cases Academic Discourse brings together state of the art analysis and theory in a single volume It also features an introduction which provides a survey and rationale for the material implications for pedagogy at the end of each chapter topical review articles with example studies a glossary The breadth of critical writing and from a wide geographical spread makes Academic Discourse a fresh and insightful addition to the field of discourse analysis *The Misteaching Of Academic Discourses* Lilia I Bartolome, 2019-07-11 This book discusses the significance of teaching working

class linguistic minority students academic discourse styles necessary for success in school and describes one teacher's attempts to do so. It is for all those educators who are faced with issues of language, race, and class.

Academic Discourse and Critical Consciousness Patricia Bizzell, 1992-12-18 This collection of essays traces the attempts of one writing teacher to understand theoretically and to respond pedagogically to what happens when students from diverse backgrounds learn to use language in college. Bizzell begins from the assumption that democratic education requires us to attempt to educate all students, including those whose social or ethnic backgrounds may have offered them little experience with academic discourse. Over the ten-year period chronicled in these essays, she has seen herself primarily as an advocate for such students, sometimes called basic writers. Bizzell's views on education for critical consciousness, widely discussed in the writing field, are represented in most of the essays in this volume. But in the last few chapters and in the intellectual autobiography written as the introduction to the volume, she calls her previous work into question on the grounds that her self-appointment as an advocate for basic writers may have been presumptuous and her hopes for the politically liberating effects of academic discourse misplaced. She concludes by calling for a theory of discourse that acknowledges the need to argue for values and pedagogy that can assist these arguments to proceed more inclusively than ever before. The essays in this volume constitute the main body of work in which Bizzell developed her influential and often cited ideas. Organized chronologically, they present a picture of how she has grappled with major issues in composition studies over the past decade. In the process, she sketches a trajectory for the development of composition studies as an academic discipline.

Discourse Anna Duszak, 2011-06-24 TRENDS IN LINGUISTICS is a series of books that open new perspectives in our understanding of language. The series publishes state-of-the-art work on core areas of linguistics across theoretical frameworks as well as studies that provide new insights by building bridges to neighbouring fields such as neuroscience and cognitive science. TRENDS IN LINGUISTICS considers itself a forum for cutting-edge research based on solid empirical data on language in its various manifestations, including sign languages. It regards linguistic variation in its synchronic and diachronic dimensions as well as in its social contexts as important sources of insight for a better understanding of the design of linguistic systems and the ecology and evolution of language. TRENDS IN LINGUISTICS publishes monographs and outstanding dissertations as well as edited volumes which provide the opportunity to address controversial topics from different empirical and theoretical viewpoints. High quality standards are ensured through anonymous reviewing.

Community Colleges and First-Generation Students Jan Osborn, 2016-04-08 Community Colleges and First-Generation Students examines a community college writing classroom through ten students from diverse linguistic, ethnic, socio-economic, and national backgrounds. Students are introduced to a version of academic discourse that challenges their identities and visions of the future.

Colloquium Karen Tracy, 1997 In academic colloquia, the most privileged and noble mission of universities is exercised: the advancing and testing of ideas, the production of truth and knowledge, an activity that

is nothing less than the the essential sound for a place of thought But as ideas advance and are tested what are people doing What is the role for emotions and relationships What worries do faculty and graduate students bring to this occasion What problems do participants face as they talk with each other How are problems made visible in talk and given attention through talk Colloquium speaks to these questions by analyzing tape recorded discussions of several academic groups and interviews in which academics reflect about their colloquium participation Colloquium addresses three key questions 1 What are the communicative problems that face graduate student and faculty participants 2 What conversational strategies are used in response to these problems and 3 How ought academics talk with each other This book develops how the academic colloquium is best conceived as a dilemmatic situation a communicative occasion involving tensions and contradiction With a dilemmatic perspective colloquium problems experienced as diffuse and hard to articulate become recognizable various conversational trivia become sensible and specific moral practical proposals emerge as defensible and desirable courses of action The work covers views that colloquium problems form the perspective of individual participants in their roles as presenters and discussants and graduate students and faculty members dilemmas discourse practices of the academic colloquium are examined from a group perspective and a philosophical and pragmatic reconstruction of practice
