The Acconia Survey A.J. Ammerman, 2017-07-05 Report of a key survey of archaeological sites in the southern toe of Italy to discover Neolithic sites and documenting prehistoric trade in obsidian **The Acconia Survey** A.J. Ammerman, 2017-07-05 Report of a key survey of archaeological sites in the southern toe of Italy to discover Neolithic sites and documenting prehistoric trade in obsidian The Chora of Croton 1 Jon Morter, 2012-10-03 From 1974 to the present the Institute of Classical Archaeology ICA at the University of Texas at Austin has carried out archaeological excavations and surveys in ancient territories chorae in southern Italy This wide ranging investigation which covers a large number of sites and a time period ranging from prehistory to the Middle Ages has unearthed a wealth of new information about ancient rural economies and cultures in the region These discoveries will be published in two multivolume series Metaponto and Croton This volume on the Neolithic settlement at Capo Alfiere is the first in the Croton series The Chora of Croton 1 reports the excavation results of a remarkable Neolithic site at Capo Alfiere on the Ionian coast Capo Alfiere is one of a very few early inhabitation sites in this area to have been excavated extensively with a full team of scientific specialists providing interdisciplinary studies on early farming and animal husbandry It provides comprehensive documentation of the economy material culture and way of life in the central Mediterranean in the sixth and fifth millennia BC Most notable are the remains of a wattle and daub hut enclosed within a massive stone wall Unique for this area this well preserved structure may have been used for special purposes such as ritual as well as for habitation The presence of Stentinello wares shows that the range of this pottery type extended further east than previously thought and casts new light on the development of ceramics in the area Europe in the Neolithic A. W. R. Whittle, 1996-05-23 Dr Whittle reviews the latest archaeological evidence on Neolithic Europe from 7000 to 2500 BC Describing important areas sites and problems he addresses the major themes that have engaged the attention of scholars the transition from a forager lifestyle the rate and dynamics of change and the nature of Neolithic society He challenges conventional views arguing that Neolithic society was rooted in the values and practices of its forager predecessors right across the continent The processes of settling down and adopting farming were piecemeal and slow Only gradually did new attitudes emerge to time and the past to the sacred realms of ancestors and the dead to nature and to the concept of community Unique in its broad and up to date coverage of long term processes of change on a continental scale this completely rewritten and revised version of Whittle s Neolithic Europe a survey reflects radical changes in the evidence and in interpretative approaches over the past decade **Materials, Productions, Exchange Network and their Impact on the Societies of Neolithic Europe** Marie Besse, Jean Guilaine, 2017-01-31 How is it possible to identify the circulation of materials or of finished objects in Neolithic Europe as well as the social networks involved Several approaches exist for the researcher and the present volume provides some examples *The Oxford Handbook of Neolithic Europe* Chris Fowler, Jan Harding, Daniela Hofmann, 2015-03-26 The Neolithic a period in which the

first sedentary agrarian communities were established across much of Europe has been a key topic of archaeological research for over a century. However, the variety of evidence across Europe, the range of languages in which research is carried out, and the way research traditions in different countries have developed makes it very difficult for both students and specialists to gain an overview of continent-wide trends. The Oxford Handbook of Neolithic Europe provides the first comprehensive geographically extensive thematic overview of the European Neolithic from Iberia to Russia and from Norway to Malta, offering both a general introduction and a clear exploration of key issues and current debates surrounding evidence and interpretation. Chapters written by leading experts in the field examine topics such as the movement of plants, animals, ideas, and people, including recent trends in the application of genetics and isotope analyses, cultural change from the first appearance of farming to the first metal artefacts, domestic architecture, subsistence, material culture, monuments, and burial, and other treatments of the dead. In doing so, the volume also considers the history of research and sets out agendas and themes for future work in the field.

The Mediterranean Context of Early Greek History Nancy H. Demand, 2012-01-17
The Mediterranean Context of Early Greek History p Drawing extensively on the latest archaeological data from the entire Mediterranean basin, Nancy Demand offers a compelling argument for situating the origins of the Greek city state within a pan-Mediterranean network of maritime interactions that stretches back millennia. Jonathan Hall, University of Chicago. Nancy Demand's book is a remarkable achievement. Her Heraklian labors have produced stunning documentation of the consequences of the vast spectrum of interaction between the peoples surrounding the Mediterranean Sea from the Mesolithic into the Iron Age. Carol Thomas, University of Washington. Were the origins of the Greek city state the polis a unique creation of Greek genius? Or did their roots extend much deeper? Noted historian Nancy H. Demand joins the growing group of scholars and historians who have abandoned traditional isolationist models of the development of the Greek polis and cast their scholarly gaze seaward to the sparkling waters of the Mediterranean. The Mediterranean Context of Early Greek History reveals the role the complex interaction of Mediterranean cultures and maritime connections had in shaping and developing urbanization, including the ancient Greek city states. Utilizing and enhancing upon the model of the fantastic cauldron first put forth by Jean Paul Morel in 1983, Demand reveals how Greek city states did not simply emerge in isolation in remote country villages but rather sprang up along the shores of the Mediterranean in an intricate maritime network of Greeks and non-Greeks alike. We learn how early seafaring trade, such as the development of obsidian trade in the Aegean, stimulated innovations in the provision of food, the Neolithic Revolution, settlement organization, political form, materials for tool production, and concepts of divinity. With deep scholarly precision, The Mediterranean Context of Early Greek History offers fascinating insights into the wider context of the Greek city state in the ancient world.

In the Footsteps of the Etruscans Graeme Barker, Tom Rasmussen, 2023-10-12 Explores the 7500-year history of the area around Tuscania near Rome using the results of an extended archaeological investigation.

The Making of the Middle Sea Cyprian

Broodbank,2024-10-17 The Mediterranean has been for millennia one of the global cockpits of human endeavour World class interpretations exist of its Classical and subsequent history but there has been remarkably little holistic exploration of how its societies culture and economies first came into being despite the fact that almost all the fundamental developments originated well before 500 BC Mediterranean archaeology is one of the worlds richest sources for the reconstruction of ancient societies yet this book is the first to draw in equal measure on ideas and information from the European western Asian and African flanks as well as the islands at the Mediterraneans heart to achieve a truly innovative focus on the varied trajectories and interactions that created this maritime world The Making of the Middle Sea is extensively illustrated and ranges across disciplines subject matter and chronology from early humans and the origins of farming and metallurgy to the rise of civilizations Egyptian Levantine Minoan Mycenaean Phoenician Etruscan early Greek and ultimately pan Mediterranean

Handbook to Life in Prehistoric Europe Jane McIntosh,2009 For most of Europe s long past we have no writing no named individuals no recorded deeds This means that its history is almost entirely that of the ordinary individual the hunter gatherer farmer or metallurgist rather than the king Evidence of privileged elites and material splendor is not lacking however The skills and expertise of prehistoric Europeans were often employed in the production of exquisite jewelry elaborately woven cloth beautifully made tools and finely wrought weapons Though the palaces that have attracted excavators in other lands are absent there are few monuments elsewhere in the world to rival Europe s massive megalithic tombs or great stone circles And though individuals preserve their anonymity and many of their secrets modern technology has made it possible to reveal parts of their life history in astonishing detail Handbook to Life in Prehistoric Europe gathers the results of recent archaeological discoveries and scholarly research into a single accessible volume Organized thematically the handbook covers all aspects of life in prehistoric Europe including the geography of the continent settlement trade and transport industry and crafts religion death and burial warfare language the arts and more Complemented with more than 75 illustrations and maps the result is a fascinating introduction to the 7 000 year period that immediately preceded the Roman Empire
