(OED (2022) Language, n.)

What is "Accounting"?

"The objective of general purpose financial reporting is to provide financial information about the reporting entity that is useful to existing and potential investors, lenders and other creditors in making decisions relating to providing resources to the entity. Those decisions involve decisions about:
(a) buying, selling or holding equity and debt instruments;

(b) providing or settling loans and other forms of credit; or
(c) exercising rights to vote on, or otherwise influence, management's actions that affect the use of the entity's economic resources."

New Zealand Equivalent to the IASB Conceptual Framework for Financial Reporting 2018, para. 1.2.

"The decisions described in paragraph 1.2 depend on the returns that existing and potential investors, lenders and other creditors expect, for example, dividends, principal and interest payments or market price increases. Investors', lenders' and other creditors' expectations about returns depend on their assessment of:

- the amount, timing and uncertainty of (the prospects for) future net cash inflows to the entity and on
- their assessment of management's stewardship of the entity's economic resources.

Existing and potential investors, lenders and other creditors need information to help them make those assessments."

NZ Equivalent to the IASB Conceptual Framework for Financial Reporting 2018, para. 1.3.

Role(s) of accounting

- Accountability (Stewardship)
 - Focus on proprietorship
 - Audience: owners
 - Past-focused (but!)
- Decision making
 - Focus on entity
 - Audience: external users (e.g. investors)
 - Future-focused (but!)

What is a "Theory"?

"A coherent set of hypothetical, conceptual and pragmatic principles forming the general framework of reference for a field of enquiry" (per Deegan, p. 102)
