Avant Garde Film Motion Studies:

Avant-Garde Film Scott MacDonald, 1993-02-26 The past thirty years have seen the proliferation of forms of independent cinema that challenge the conventions of mass market commercial movies from within the movie theatre Avant Garde Film examines fifteen of the most suggestive and useful films from this film tradition The films discussed include No 4 Bottoms by Yoko Ono Wavelength by Michael Snow Serene Velocity by Ernie Gehr Print Generation by J J Murphy Standard Gauge by Morgan Fisher Zorns Lemma by Hollis Frampton The Ties that Bind by Su Friedrich From the Pole to the Equator by Yervant Gianikian and The Carriage Trade by Warren Sonbert Through in depth readings of these works Scott MacDonald takes viewers on a critical circumnavigation of the conventions of movie going as seen by filmmakers who have rebelled against the conventions MacDonald s discussions do not merely analyse the films they provide a useful accessible jargon free critical apparatus for viewing avant garde film and communicate the author s pleasure in exploring impenetrable works

Avant-garde Film Scott MacDonald, 1993 *The ^AMusic and Sound of Experimental Film* Holly Rogers, Jeremy Barham, 2017-06-29 This book explores the role of music and sound in experimental film from the earliest work of pioneers such as Walther Ruttmann to latter day experiments with new and digital media Chapters examine issues relating to the avant garde abstraction animation found footage queer film visual music and VJing Cine-Dispositives Maria Tortajada, François Albera, 2025-10-01 This collection brings together a number of leading scholars in film studies to explore viewing and listening dispositives the Foucauldian concept of a strategic and technical configuration of practices and discourses from the emergence of film studies as a field in the 1960s to more recent uses of the concept In particular the contributors confront points of view and perspectives in the context of the rise and spread of new technologies changes that are continually altering the boundaries and the spaces of cinema and thus demand new analysis and theoretization *A History of Experimental Film and Video* A.L. Rees, 2019-07-25 Avant garde film is almost indefinable It is in a constant state of change and redefinition In his highly acclaimed history of experimental film A L Rees tracks the movement of the film avant garde between the cinema and modern art with its postmodern coda But he also reconstitutes the film avant garde as an independent form of art practice with its own internal logic and aesthetic discourse In this revised and updated edition Rees introduces experimental film and video to new readers interested in the wider cinema as well as offering a guide to enthusiasts of avant garde film and new media arts Ranging from C zanne and Dada via Cocteau Brakhage and Le Grice to the new wave of British film and video artists from the 1990s to the present day this expansive study situates avant garde film between the cinema and the gallery with many links to sonic as well as visual arts The new edition includes a review of current scholarship in avant garde film history and includes updated reading and viewing lists It also features a new introduction and concluding chapter which assess the rise of video projection in the gallery since the millennium and describe new work by the latest generation of experimental film makers The new edition is richly illustrated with images of

the art works discussed **Stars** Lucy Fischer, Marcia Landy, 2004 From two distinguished academics this book includes contributions from top scholars such as Richard Dyer and brings together key writings and new perspectives on stars and stardom in cinema across the world **A Critical Cinema 5** Scott MacDonald, 2006 A Critical Cinema 5 is the fifth volume in Scott MacDonald's Critical Cinema series the most extensive in depth exploration of independent cinema available in English **A New Pot of Gold** Stephen Prince, 2002-03-15 Facing an economic crisis in the 1980s Hollywood moved to control the markets of videotape pay cable and pay per view This volume examines the transformation that took the industry from the production of theatrical film to media software *Ecodocumentaries* Rayson K. Alex, S. Susan Deborah, 2016-11-15 This book features ten critical essays on ecodocumentaries written by eminent scholars from India USA Ireland Finland and Turkey in the area of ecocinema studies Situating social documentaries with explicit ecological form and content the volume takes relational positions on political cultural and conservational aspects of natures and cultures in various cultural contexts Documentaries themed around issues such as electronic waste animal rights land ethics pollution of river land grabbing development and exotic plants are some of the topics ecocritiqued in this volume Technology and the Making of Experimental Film Culture John Powers, 2023 The Bolex camera 16mm reversal film stocks commercial film laboratories and low budget optical printers were the small gauge media technologies that provided the infrastructure for experimental filmmaking at the height of its cultural impact Technology and the Making of Experimental Film Culture examines how the avant garde embraced these material resources and invested them with meanings and values adjacent to those of semiprofessional film culture By reasserting the physicality of the body in making time lapse and kinesthetic sequences with the Bolex filmmakers conversed with other art forms and integrated broader spheres of humanistic and scientific inquiry into their artistic process Drawing from the photographic qualities of stocks such as Tri X and Kodachrome they discovered pliant metaphors that allowed them to connect their artistic practice to metaphysics spiritualism and Hollywood excess By framing film labs as mystical or adversarial they cultivated an oppositionality that valorized control over the artistic process And by using the optical printer as a tool for excavating latent meaning out of found footage they posited the reworking of images as fundamental to the exploration of personal and cultural identity Providing a wealth of new detail about the making of canonized avant garde classics by such luminaries as Carolee Schneemann Jack Smith and Stan Brakhage as well as rediscovering works from overlooked artists such as Chick Strand Amy Halpern and Gunvor Nelson Technology and the Making of Experimental Film Culture uses technology as a lens for examining the process of making where ideas come from how they are put into practice and how arguments about those ideas foster cultural and artistic commitments and communities
