Avian Ecology And Conservation In An Urbanizing World:

Avian Ecology and Conservation in an Urbanizing World John M. Marzluff, Reed Bowman, Roarke Donnelly, 2001-09-30
The twenty seven contributions authored by leaders in the fields of avian and urban ecology present a unique summary of current research on birds in settled environments ranging from wildlands to exurban rural to urban **Urban Ecology** John Marzluff, Eric Shulenberger, Wilfried Endlicher, marina Alberti, Gordon Bradley, Clare Ryan, Craig ZumBrunnen, Ute Simon, 2008-01-03 Urban Ecology is a rapidly growing field of academic and practical significance Urban ecologists have published several conference proceedings and regularly contribute to the ecological architectural planning and geography literature However important papers in the field that set the foundation for the discipline and illustrate modern approaches from a variety of perspectives and regions of the world have not been collected in a single accessible book Foundations of Urban Ecology does this by reprinting important European and American publications filling gaps in the published literature with a few targeted original works and translating key works originally published in German This edited volume will provide students and professionals with a rich background in all facets of urban ecology The editors emphasize the drivers patterns processes and effects of human settlement The papers they synthesize provide readers with a broad understanding of the local and global aspects of settlement through traditional natural and social science lenses This interdisciplinary vision gives the reader a comprehensive view of the urban ecosystem by introducing drivers patterns processes and effects of human settlements and the relationships between humans and other animals plants ecosystem processes and abiotic conditions The reader learns how human institutions health and preferences influence and are influenced by the others members of their shared urban ecosystem Urban Bird Ecology and Conservation Christopher A. Lepczyk, Paige S. Warren, 2012-10-26 A publication of the Cooper Ornithological Society *Welcome to Subirdia* John M. Marzluff, 2014-09-30 Discusses how a large number of species of birds and other smaller animals have adapted to living in suburban and urban areas and provides ten strategies that can be used to create a friendlier environment in which they can continue to thrive Urban Ecosystem Ecology J. Aitkenhead-Peterson, 2020-01-22 If more than half of the Earth's people live in cities and the amount of paved surfaces in the United States is equivalent to the area of Ohio shouldn't our sciences thrive in the city Urban Ecosystem Ecology takes on the important task of reconciling environmental sciences with the world's growing urbanization From wildlife to water from urban agriculture to low impact development we need a better understanding of the urban ecosystem *Nature in Fragments* Elizabeth A. Johnson, Michael W. Klemens, 2005-10-05 This new collection focuses on the impact of sprawl on biodiversity and the measures that can be taken to alleviate it Leading biological and social scientists conservationists and land use professionals examine how sprawl affects species and alters natural communities ecosystems and natural processes The contributors integrate biodiversity issues concerns and needs into the growing number of anti sprawl initiatives including the smart growth and new urbanist movements *Bird Conservation Implementation and*

Integration in the Americas, 2005 **Handbook of Road Ecology** Rodney van der Ree, Daniel J. Smith, Clara Grilo, 2015-04-02 Winner of the IENE Project Award 2016 This authoritative volume brings together some of the world's leading researchers, academics, practitioners and transportation agency personnel to present the current status of the ecological sustainability of the linear infrastructure primarily road, rail and utility easements that dissect and fragment landscapes globally. It outlines the potential impacts, demonstrates how this infrastructure is being improved and how broad ecological principles are applied to mitigate the impact of road networks on wildlife. Research and monitoring is an important aspect of road ecology encompassing all phases of a transportation project. This book covers research and monitoring to span the entire project continuum starting with planning and design through construction and into maintenance and management. It focuses on impacts and solutions for species groups and specific regions with particular emphasis on the unique challenges facing Asia, South America and Africa. Other key features: Contributions from authors originating from over 25 countries including from all continents. Each chapter summarizes important lessons and includes lists of further reading and thoroughly up to date references. Highlights principles that address key points relevant to all phases in all road projects. Explains best practices based on a number of successful international case studies. Chapters are stand alone but they also build upon and complement each other. Extensive cross referencing directs the reader to relevant material elsewhere in the book. Handbook of Road Ecology offers a comprehensive summary of approximately 30 years of global efforts to quantify the impacts of roads and traffic and implement effective mitigation. As such it is essential reading for those involved in the planning, design, assessment and construction of new roads, the management and maintenance of existing roads and the modifying or retrofitting of existing roads and problem locations. This handbook is an accessible resource for both developed and developing countries including government transportation agencies, Government environmental conservation agencies, NGOs and road funding and donor organisations *Urban Biodiversity and Design* Norbert Muller, P. Werner, J. G. Kelcey, 2010-03-05 With the continual growth of the world's urban population, biodiversity in towns and cities will play a critical role in global biodiversity. This is the first book to provide an overview of international developments in urban biodiversity and sustainable design. It brings together the views, experiences and expertise of leading scientists and designers from the industrialised and pre-industrialised countries from around the world. The contributors explore the biological, cultural and social values of urban biodiversity including methods for assessing and evaluating urban biodiversity, social and educational issues and practical measures for restoring and maintaining biodiversity in urban areas. Contributions come from presenters at an international scientific conference held in Erfurt, Germany, 2008 during the 9th Conference of the Parties of the Convention on Biodiversity. This is also Part of our Conservation Science and Practice book series with Zoological Society of London Urban Biodiversity Erik Kiviatt, Kristi MacDonald, 2022-07-26 In a case study of urban biodiversity, Erik Kiviatt and Kristi MacDonald present two decades of data and assessment of the habitats and biota of the Meadowlands Urban

Biodiversity The Natural History of the New Jersey Meadowlands documents the mammals birds reptiles amphibians fish butterflies bees dragonflies seed plants mosses and lichens of the Meadowlands region and their patterns of occurrence The work records the natural history of an urban industrial region helping decision makers foster the biodiversity that thrives in cities and giving planners tools to reduce the biological degradation that occurs with urbanization For more info please visit this link <https://www.hudsonia.org/nj-meadowlands>
