The Absent Image Elina Gertsman, 2021-06-22 Winner of the 2022 Charles Rufus Morey Award from the College Art Association Winner of the 2023 Otto Gröndler Book Prize from Western Michigan University Guided by Aristotelian theories medieval philosophers believed that nature abhors a vacuum Medieval art according to modern scholars abhors the same The notion of horror vacui the fear of empty space is thus often construed as a definitive feature of Gothic material culture In The Absent Image Elina Gertsman argues that Gothic art in its attempts to grapple with the unrepresentability of the invisible actively engages emptiness voids gaps holes and erasures Exploring complex conversations among medieval philosophy physics mathematics piety and image making Gertsman considers the concept of nothingness in concert with the imaginary revealing profoundly inventive approaches to emptiness in late medieval visual culture from

ingenious images of the world's creation ex nihilo to figurations of absence as a replacement for the invisible forces of conception and death. Innovative and challenging, this book will find its primary audience with students and scholars of art, religion, physics, philosophy, and mathematics. It will be particularly welcomed by those interested in phenomenological and cross-disciplinary approaches to the visual culture of the later Middle Ages. *Lost Bodies* Laura E. Tanner, 2018-07-05

If the dying body makes us flinch and look away, struggling not to see what we have seen, the lost body disappears from cultural view, buried along with the sensory traces of its corporeal presence from the Introduction. American popular culture conducts a passionate love affair with the healthy, fit, preferably beautiful body, and in recent years, theories of embodiment have assumed importance in various scholarly disciplines. But what of the dying or dead body? Why do we avert our gaze, speak of it only as absence? This thoughtful and beautifully written book, illustrated with photographs by Shellburne Thurber and other remarkable images, finds a place for the dying and lost body in the material, intellectual, and imaginary spaces of contemporary American culture. Laura E. Tanner focuses her keen attention on photographs of AIDS patients and abandoned living spaces, newspaper accounts of September 11, literary works by Don DeLillo, Donald Hall, Sharon Olds, Marilynne Robinson, and others, and material objects including the AIDS Quilt. She analyzes the way in which these representations of the body reflect current cultural assumptions, revealing how Americans read, imagine, and view the dynamics of illness and loss. The disavowal of bodily dimensions of death and grief, she asserts, deepens rather than mitigates the isolation of the dying and the bereaved. *Lost Bodies* will speak to anyone imperiled by the threat of loss. *Four Letters to the Witnesses of My Childhood* Helena Ganor, 2022-09-01

The evocation of memory is wrought with emotional and historical significance in this distinctive Holocaust memoir. With lyrical prose and remarkable candor, Helena Ganor narrates her story through a series of recently penned letters to the significant people in her life during her wartime girlhood: her sister, mother, father, and stepmother. Both Ganor's mother and sister perished during the war. The author's letters reveal much about living in pre-war Lvov, Poland. Her descriptions of relationships between local Jews, Poles, Ukrainians, and Gypsies in Lvov lend a broad historical context to the Holocaust. Ganor combines deeply personal reminiscences of trying to survive as a secular Jew under Nazi occupation with reflections on the varied ways that humans respond in the face of utter catastrophe. Punctuating her letters with poems, Ganor's story is an inspiring contribution to Holocaust literature. *Phenomenology, Interpretation, and Community* Lenore Langsdorf, Stephen H. Watson, E. Marya Bower, 1996-07-11

This book re-examines the relationship between phenomenology, interpretation, and the problem of community, a topic that has been at the center of recent debates in Continental thought. From the outset, phenomenology was intimately connected with the issues of interpretation and community, both by theoretical paradigm and substance. Indeed, Husserl sought to distinguish his own foundational investigations from others that stressed the interpretive and historical character of the rational, or that contested such foundational enterprises out of a concern for the critique of ideology and the hermeneutics of suspicion. He argued equally as

stringently for the primacy of such theoretical issues over other studies such as ethics political theory or aesthetics that shaped the itinerary of philosophical inquiry In a similar manner the essays encountered here continue the debates that accompany the complex phenomenologies of post Kantian Continental thought concerning the rational status of the self and its ambiguous relationship with the community and thus in turn the ambiguous relationship between the rational community civil society and the contested dynamics of its conceptualization and adjudication Because it considers these issues from several viewpoints including the legacy of German idealism and the discourses emerging from the Frankfurt School and contemporary post structuralist thought this volume serves both as an introduction to Continental philosophy on these issues as well as a guide to the status of recent debates Contemporary Photography and Theory Sally Miller,2019-11-14

Exploring contemporary theory and practice in photography this textbook moves beyond introductory studies to cover more advanced concepts for the upper level student Building on a foundational understanding of photography it addresses recent theoretical debates and more complex ideas to enable students to acquire the tools and confidence to develop the independent thinking and analytical skills needed for this level of study Contemporary Photography and Theory analyses five key topics identity place the politics of looking psychoanalysis and the event Its conceptual approach encourages students to apply theoretical texts to a range of issues and themes both in their own work and that of others Each topic is broken down into three chapters to address the central concept in detail supported by the following features Troubleshooting footnotes to flag up and clarify common misunderstandings Detailed case studies to show how theoretical concepts can be applied to artists work Further examples and reading suggestions from an international range of photographers and thinkersThe chapters are designed to be a suitable length for assigned weekly readings making this the ideal resource for in class discussion as well as the perfect starting place for dissertation research Clown of the City Stephan de Beer,2020-11-25 At opening this book everything one has learned or thought about urban ministry is challenged and changed Stephan de Beer offers a fresh exciting and thoroughly engaging approach The title is enticing and playful but the book is a serious grappling with the daunting realities of a shadowed marginalised urban life It does not theorise or pontificate about a concept The author is not a distant neutral observer He is an engaged minister to the people a struggler in their struggles prophet to the powerful This book invites the reader to join the people of the cities under siege by failed policies empty promises and disastrous politics in their struggles for meaningful life and it makes a powerful persuasive case Stephan de Beer has offered us a great gift and a wonderful opportunity to think and hope anew and differently about the life reality and future of the city
