Scenes of the Obscene Kassandra Nakas, Jessica Ullrich, 2014-05-27 Artists and the public alike have always been fascinated by obscene imagery The Obscene however is difficult to define One of the earliest interpretations is of Greek origin and argues that the word derives from *ob skene* indicating the space behind the stage or scene Off scene remains what should be hidden from public view be it morally questionable offensive disgusting or unbearable to look at This book presents a collection of essays that cast light on some Scene of the Obscene in art and visual culture from the Middle Ages to today taking into consideration the malleable nature of socio cultural assumptions and theoretical reflections on the topic The contributions focus on historically distinct artistic acts and social sites where established cultural categories and legal norms are violated with artists and publishers deliberately breaking moral taboos and offending the public taste They discuss how society reacted to these transgressions and how obscenity and its conceptions shape the face of their respective time **A Companion to Medieval Art** Conrad Rudolph, 2019-05-07 A fully updated and comprehensive companion to Romanesque and Gothic art history This definitive reference brings together cutting edge scholarship devoted to the Romanesque and Gothic traditions in Northern Europe and provides a clear analytical survey of what is happening in this major area of Western art history The volume comprises original theoretical historical and historiographic essays written by renowned and emergent scholars who discuss the vibrancy of medieval art from both thematic and sub disciplinary perspectives Part of the Blackwell Companions to Art History A Companion to Medieval Art Second Edition features an international and ambitious range of contributions covering reception formalism Gregory the Great pilgrimage art gender patronage marginalized images the concept of *spolia* manuscript illumination stained glass Cistercian architecture art of the crusader states and more Newly revised edition of a highly successful companion including 11 new articles Comprehensive coverage ranging from vision materiality and the artist through to architecture sculpture and painting Contains full color illustrations throughout plus notes on the book s many distinguished contributors A Companion to Medieval Art Romanesque and Gothic in Northern Europe Second Edition is an exciting and varied study that provides essential reading for students and teachers of Medieval art ***Illuminating Metalwork*** Joseph Salvatore Ackley, Shannon L. Wearing, 2021-12-20 The presence of gold silver and other metals is a hallmark of decorated manuscripts the very characteristic that makes them illuminated Medieval artists often used metal pigment and leaf to depict metal objects both real and imagined such as chalices crosses tableware and even idols the luminosity of these representations contrasted pointedly with the surrounding paints enriching the page and dazzling the viewer To elucidate this key artistic tradition this volume represents the first in depth scholarly assessment of the depiction of precious metal objects in manuscripts and the media used to conjure them From Paris to the Abbasid caliphate and from Ethiopia to Bruges the case studies gathered here forge novel approaches to the materiality and pictoriality of illumination In exploring the semiotic material iconographic and technical dimensions of these manuscripts the

authors reveal the canny ways in which painters generated metallic presence on the page Illuminating Metalwork is a landmark contribution to the study of the medieval book and its visual and embodied reception and is poised to be a staple of research in art history and manuscript studies accessible to undergraduates and specialists alike

Iconography Beyond the Crossroads Pamela A. Patton, Catherine A. Fernandez, 2023-03-23

This volume assesses how current approaches to iconology and iconography break new ground in understanding the signification and reception of medieval images both in their own time and in the modern world Framed by critical essays that apply explicitly historiographical and sociopolitical perspectives to key moments in the evolution of the field the volume s case studies focus on how iconographic meaning is shaped by factors such as medieval modes of dialectical thought the problem of representing time the movement of the viewer in space the fragmentation and injury of both image and subject and the complex strategy of comparing distant cultural paradigms The contributions are linked by a commitment to understanding how medieval images made meaning to highlighting the heuristic value of new perspectives and methods in exploring the work of the image in both the Middle Ages and our own time and to recognizing how subtle entanglements between scholarship and society can provoke mutual and unexpected transformations in both Collectively the essays demonstrate the expansiveness flexibility and dynamism of iconographic studies as a scholarly field that is still heartily engaged in the challenge of its own remaking Along with the volume editors the contributors include Madeline H Caviness Beatrice Kitzinger Aden Kumler Christopher R Lakey Glenn Peers Jennifer Purtle and Elizabeth Sears

English Medieval Misericords Paul Hardwick, 2011 Misericord carvings present a fascinating corpus of medieval art which in turn complements our knowledge of life and belief in the late middle ages Subjects range from the sacred to the profane and from the fantastic to the everyday seemingly giving equal weight to the scatological and the spiritual alike Focusing specifically on England though with cognisance of broader European contexts this volume offers an analysis of misericords in relation to other cultural artefacts of the period Through a series of themed case studies the book places misericords firmly within the doctrinal and devotional milieu in which they were created and sited arguing that even the apparently coarse images to be found beneath choir stalls are intimately linked to the devotional life of the medieval English Church The analysis is complemented by a gazetteer of the most notable instances Dr Paul Hardwick is Professor in English Leeds Trinity University College

How the West Became Antisemitic Ivan G. Marcus, 2025-08-05 An examination of how the Jews real and imagined so challenged the Christian majority in medieval Europe that it became a society that was religiously and culturally antisemitic in new ways In medieval Europe Jews were not passive victims of the Christian community as is often assumed but rather were startlingly assertive

forming a Jewish civilization within Latin Christian society Both Jews and Christians considered themselves to be God's chosen people These dueling claims fueled the rise of both cultures as they became rivals for supremacy In *How the West Became Antisemitic* Ivan Marcus shows how Christian and Jewish competition in medieval Europe laid the foundation for modern antisemitism Marcus explains that Jews accepted Christians as misguided practitioners of their ancestral customs but regarded Christianity as idolatry Christians on the other hand looked at Jews themselves not Judaism as despised They directed their hatred at a real and imagined Jew theoretically subordinate but sometimes assertive an implacable enemy within In their view Jews were permanently and physically Jewish impossible to convert to Christianity Thus Christians came to hate Jews first for religious reasons and eventually for racial ones Even when Jews no longer lived among them medieval Christians could not forget their former neighbors Modern antisemitism based on the imagined Jew as powerful and world dominating is a transformation of this medieval hatred A sweeping and well documented history of the rivalry between Jewish and Christian civilizations during the making of Europe *How the West Became Antisemitic* is an ambitious new interpretation of the medieval world and its impact on modernity
