are not necessary in graphics applications It categorizes current graphics tools according to their applications and provides many weblinks to important resources on the Internet The purpose is to provide an exhaustive list of graphics tools with their major applications and functions The reference list may contain some inaccuracies since new tools are constantly emerging VI Preface and old tools become obsolete Through explaining and categorizing these graphics tools and their primary applications we hope to provide learners and researchers with different means and application areas in computer graphics and help them understand and use visualization modeling animation simulation virtual reality and many online resources
